SHOT BY CANTY.

Murder of George S. Rye, a Western Speculator, on a Washington Street.

Washington, March 15.—Dennis J. Carty, formerly a clerk in the interstate commerce commission, and later a partner with Herman VanSenden, private secretary to Secretary Carlisle in the last administration, in the stock and securities business, and his son, Dennis and Kline, George S. Bye, a speculator whose home is in the West, in front of the Elks Club, here on Fifth street, near Franklin. It is asserted that the killing grew out of some stock transactions and perhaps may have been connected with the failure several months ago of the "Pioneer." The "Pioneer" was not a member of the New York exchange but did a considerable business among the smaller class of speculators. It is said that he has been feeling better of late, and for some time and that Carty had threatened Carty's life. Today, while Carty was standing near the corner of Franklin and Fifth in front of the Elks Club, he was approached by Carty, who, Carty's friends say, made a threatening demand with a knife. Carty, who is a rascal, As he turned to run, Carty backed away from him and when he fled, plowed by two of the four bullets. Carty had fired, he was about twenty feet from Carty. The "Pioneer" was arrested and taken to the First precinct station.

SMALLPOX IN KENTUCKY.

Middlesboro has Seventy Cases and About 400 Suspects.

Frankfort, Ky., March 15.—The governor received a message from Middlesboro today stating that there are seventy new cases of smallpox and 400 suspects there; that the city is quarantined; no mail money, the county can appropriate \$1000 to help the city stricken people are liable to start.

He at once prepared an emergency special session of the legislature, which is in session, for the last day, urging them to make an appropriation and intimating that he will sign a resolution that will give the question about the regularities of putting such a measure through in one day. Six members of the board of health met at once and are asking the legislature to call a special session to consider what men able to go to the scene of the trouble may be appointed to their stead.

ST. LOUIS BASEBALL RUMORS. St. Louis, March 15.—Manager Tom Hause and the St. Louis Browns left here for West Badia Springs, Ind., where they will put in several weeks' practice before the National league season opens up. The Browns will play here on April 15 with Chicago. It is rumored that Chris Von

Ahe is no longer owner of the Browns, and that the team has been purchased by John T. Brush, the Cincinnati baseball magnate. Both Von Ahe and President McKenney deny the story emphatically.

INHERITANCE TAX NOT LEGAL. Is Unconstitutional.

Jefferson City, Mo., March 15.—Supreme court, in a suit brought in, on appeal by Chief Justice Grant, decided the inheritance tax law passed by the legislature in 1895 for the benefit of the state university is unconstitutional. The opinion was concurred in by all the judges.

NAMED BY MCKINLEY.

Another Batch of Appointments By the President.

Washington, March 15.—The president today sent these nominations to the Senate:

L. D. Postlethwait, to be receiver of the money at Dodge City, Kan.; Albert L. Love, register of the land office at Ogallala, Neb.; W. H. Williams, to be had and when whom was talked over, but without consideration to any definite conclusion on any new provisions. Information concerning the appointment of a new collector of customs at Pensacola, Fla., was not communicated to the Senate, but it was added with his consent that this ship be added with the United States navy.

MAY BUY THE AQUADABAN.

Reconstructed Brazil Battleship Now Called the De Maio.

London, March 15.—The United States government is negotiating for the purchase of the Brazilian battleship De Maio, formerly the Aquidabon, the flagship of Admiral Mello, which has lately been reconstructed in England.

MAINE REPORT NEARLY READY

Will Probably Be Forwarded to the President In Two or Three Days at the Outside.

CUBAN JUNTA PLEASED

Senor Quesada's Presence at Vice President Hobart's Reception Styled a Recognition of the Cuban Republic.

New York, March 15.—The World's correspondent telegraphs from Havana today that the report of the naval board of inquiry will be ready to forward to Washington in two or three days at the outside. A few little details of expert testimony are being carefully collected to wind up things, and the drawings and plans based on the divers' investigation are nearly finished. The divers are rapidly dredging now to verify the points already suggested by previous discoveries and to take accurate measurements of certain important port plates of the wrecked cruiser and the twisted ram, which lie in such a position as to prove that an outside force destroyed the battleship.

THE JUNTA IS PLEASED.

Representative of the Cuban Republic Officially Recognized.

New York, March 15.—Dr. Thomas Estrada Palma, of the Cuban Junta in this city, said: "I consider Mr. Quesada's presence at Vice President Hobart's reception to the Belgian prince in Washington yesterday a matter of great importance. He was invited as the accredited representative of the Cuban republic. Mr. Quesada's presence under the circumstances as an honored guest is very significant. His arrival here is a great event. The Cuban junta has the Cuban cause, and I am glad he has made that fact known in such a manner."

REINFORCING THE NAVY.

Measures for Naval Defense Considered by the Cabinet.

Washington, March 15.—Nothing of special importance was discussed at today's cabinet meeting. A large part of the session was consumed in the general discussion of the measures being taken to place the navy on a proper footing for defense in case of trouble. The question of the purchase of war vessels, however, was so high that a plunging fire at the dock of a ship may be delivered. All of the formidable weapons are so accurately pointed that a single broadside of the 10-inch battery at Fort Monroe will sweep the deck of a ship.

The 10-inch gun is the largest gun ever mounted on a battleship. The 12-inch gun is the second largest. The 15-inch gun is the third largest. The 18-inch gun is the fourth largest. The 20-inch gun is the fifth largest. The 22-inch gun is the sixth largest. The 24-inch gun is the seventh largest. The 26-inch gun is the eighth largest. The 28-inch gun is the ninth largest. The 30-inch gun is the tenth largest. The 32-inch gun is the eleventh largest. The 34-inch gun is the twelfth largest. The 36-inch gun is the thirteenth largest. The 38-inch gun is the fourteenth largest. The 40-inch gun is the fifteenth largest. The 42-inch gun is the sixteenth largest. The 44-inch gun is the seventeenth largest. The 46-inch gun is the eighteenth largest. The 48-inch gun is the nineteenth largest. The 50-inch gun is the twentieth largest. The 52-inch gun is the twenty-first largest. The 54-inch gun is the twenty-second largest. The 56-inch gun is the twenty-third largest. The 58-inch gun is the twenty-fourth largest. The 60-inch gun is the twenty-fifth largest. The 62-inch gun is the twenty-sixth largest. The 64-inch gun is the twenty-seventh largest. The 66-inch gun is the twenty-eighth largest. The 68-inch gun is the twenty-ninth largest. The 70-inch gun is the thirty-first largest. The 72-inch gun is the thirty-second largest. The 74-inch gun is the thirty-third largest. The 76-inch gun is the thirty-fourth largest. The 78-inch gun is the thirty-fifth largest. The 80-inch gun is the thirty-sixth largest. The 82-inch gun is the thirty-seventh largest. The 84-inch gun is the thirty-eighth largest. The 86-inch gun is the thirty-ninth largest. The 88-inch gun is the forty-first largest. The 90-inch gun is the forty-second largest. The 92-inch gun is the forty-third largest. The 94-inch gun is the forty-fourth largest. The 96-inch gun is the forty-fifth largest. The 98-inch gun is the forty-sixth largest. The 100-inch gun is the forty-seventh largest. The 102-inch gun is the forty-eighth largest. The 104-inch gun is the forty-ninth largest. The 106-inch gun is the fifty-first largest. The 108-inch gun is the fifty-second largest. The 110-inch gun is the fifty-third largest. The 112-inch gun is the fifty-fourth largest. The 114-inch gun is the fifty-fifth largest. The 116-inch gun is the fifty-sixth largest. The 118-inch gun is the fifty-seventh largest. The 120-inch gun is the fifty-eighth largest. The 122-inch gun is the fifty-ninth largest. The 124-inch gun is the sixty-first largest. The 126-inch gun is the sixty-second largest. The 128-inch gun is the sixty-third largest. The 130-inch gun is the sixty-fourth largest. The 132-inch gun is the sixty-fifth largest. The 134-inch gun is the sixty-sixth largest. The 136-inch gun is the sixty-seventh largest. The 138-inch gun is the sixty-eighth largest. The 140-inch gun is the sixty-ninth largest. The 142-inch gun is the七十 largest. The 144-inch gun is the seventy-first largest. The 146-inch gun is the seventy-second largest. The 148-inch gun is the seventy-third largest. The 150-inch gun is the seventy-fourth largest. The 152-inch gun is the seventy-fifth largest. The 154-inch gun is the seventy-sixth largest. The 156-inch gun is the seventy-seventh largest. The 158-inch gun is the seventy-eighth largest. The 160-inch gun is the seventy-ninth largest. The 162-inch gun is the eighty-first largest. The 164-inch gun is the eighty-second largest. The 166-inch gun is the eighty-third largest. The 168-inch gun is the eighty-fourth largest. The 170-inch gun is the eighty-fifth largest. The 172-inch gun is the eighty-sixth largest. The 174-inch gun is the eighty-seventh largest. The 176-inch gun is the eighty-eighth largest. The 178-inch gun is the eighty-ninth largest. The 180-inch gun is the ninety-first largest. The 182-inch gun is the ninety-second largest. The 184-inch gun is the ninety-third largest. The 186-inch gun is the ninety-fourth largest. The 188-inch gun is the ninety-fifth largest. The 190-inch gun is the ninety-sixth largest. The 192-inch gun is the ninety-seventh largest. The 194-inch gun is the ninety-eighth largest. The 196-inch gun is the ninety-ninth largest. WHEAT DECLINED

July Wheat Sold Down Nearly One Cent More at Chicago.

TRADING WAS DULL

May Held Steady and Firm With the Support of Leiter.

Wheat opened easier today but soon developed strength. It was quite dull and the changes in July wheat at Chicago were entirely due to local manipulations. It turned weak late in the afternoon and closed lower than it had been for the day, but May closed firm as at 12:00, probably by the latter clique. May is still the favorite trading option on the Duluth board. It opened higher at 88¢ 1/2, advanced to 88¢ 3/4, reacted to 88¢ 1/2, then closed still lower at 88¢ 1/4. The same price as yesterday morning, though a little stiff at 88¢ 1/4, and the elevators took it up again at a similar premium. May and June were selling well with the closing prices:

Wheat	No. 1 hard	cash	88¢ 1/2
May	No. 1 hard	cash	88¢ 1/4
June	No. 1 hard	cash	88¢ 1/4
July	No. 1 hard	cash	88¢ 1/4
August	No. 1 hard	cash	88¢ 1/4
September	No. 1 hard	cash	88¢ 1/4
October	No. 1 hard	cash	88¢ 1/4
November	No. 1 hard	cash	88¢ 1/4
December	No. 1 hard	cash	88¢ 1/4

morning and the regular interests are credited with heavy realization. Sales to

date are \$1,000,000.00 for the day.

County Attorney Arbury's

Omission May Knock a

Case Out of Court.

The case against Philip March and Roy Walker, charged with burglary in the third degree for breaking into an Eastern Minnesota box car, was expected to go to the jury this afternoon, but the trial was adjourned until next Monday.

March, 25, 1897, was arrested at 12:00, pro-

secuted by the latter clique. May is still

the favorite trading option on the Duluth

board. It opened higher at 88¢ 1/2, ad-

vanced to 88¢ 3/4, reacted to 88¢ 1/2. The

close was still lower at 88¢ 1/4. The

same price as yesterday morning,

though a little stiff at 88¢ 1/4, and the elevators took it up again at a similar premium. May and June were

selling well with the closing prices:

Wheat, No. 1 hard, cash, 88¢ 1/2; May, 88¢ 1/4; June, 88¢ 1/4; July, 88¢ 1/4; August, 88¢ 1/4; September, 88¢ 1/4; October, 88¢ 1/4; November, 88¢ 1/4; December, 88¢ 1/4.

ON THE CHICAGO BOARD.

Wheat Opened Easy But Later Ex-
hibited Strength.

Chicago, March 15.—What showed some
easiness at the opening, July starting a
shade lower at 88¢ 1/4. There was an
other large addition to the contract wheat,
there being 6 cars and 25,000 bushels of
new wheat added to the 125,000 of the
regular receipts of 100 cars 50¢ were of
contract grade—in all about 125,000.
The market was quiet, with no tendency
to either rise or fall, and the market was
considerable over the theoretical requirements,
though that market showed a slight decline
during the week. The market was
calm, with the exception of a slight
falling away from the opening, but the
market was quite strong even at the
outset to prevent any decline. Later the de-
mand was made for a little more, but
the market was quiet, with no tendency
to either rise or fall, and the market was
considerable over the theoretical require-
ments, though that market showed a slight
falling away from the opening, but the
market was quite strong even at the
outset to prevent any decline. The market

THE WEATHER.

United States Agricultural Department Weather Bureau, Washington,豫告 of weather conditions for the twenty-four hours ending at 7 a.m. central time, March 15, 1898. The weather has been very cool and damp yesterday in Western Nebraska has moved slowly northward, developing a general area of scattered showers and rain, and, in the center of the storm area, thunderstorms have occurred at Grand Island, Nebraska. The weather has been general in the Mississippi and Lower Missouri valleys, with snows having occurred at nearly all stations in the Northwest, the heaviest precipitation occurring at 40 miles from Minneapolis and 50 inch at Bismarck. The latter falling partly in the form of snow. Fair weather has returned to the Southwest. Elsewhere the weather was cloudy at 7 o'clock this morning, rain continuing at All Points. The weather has been fair in City, Hayne, Swift Current and Edmonton.

SPRING OVERCOATS...

There is a peculiar and valuable individuality about our Overcoats that proclaim their superiority. We claim our Overcoats are more stylish, better made, and are sold for less money than Overcoats found in the usual Clothing Store. Our Overcoats are all the new 1898 styles, made up from the best cloths, fashionable in design, not extreme; tailored by experienced hands, and sold nearer the cost of making than any other good garments in this country.

The First Thing

A Man Needs in the Spring is a Top Coat

It is really as necessary in the spring as in the autumn, in fact a garment for every season of the year. During the early morning and late evenings a top coat is a necessity. We show them in light and dark colors, Cassimeres, Cheviots, Viscumas, Meltons, Kersies, Black and Fawn, Cy Worsted, Coverlet and Thibet cloths. Those of our stock which bear this label

And which we sell at

\$10, \$12, \$15, \$18, \$20

We warrant equal to first-grade tailor-made-to-order garments at double, or more than double, our prices. Give us an idea of what you want, we will fit you with a Top Coat without any complicated measurements or delay, and but one "try-on."

YOUR MONEY BACK IF YOU WANT IT.

M. S. Burrows.

He Will Investigate.

Brinham Arrives to Look into the Horse Disease.
A full of the state board of health in the city yesterday, and investigated the alleged recent anthrax among horses made their appearance near Duluth, known, there has been but the very fact has displayed a great amount of alarm. This was the same horse on Duluth which was taken sick Saturday and died at the hospital after an operation. A fast form of the ailment, and Topester Baker of the city's largest stable, said this morning, "I am not worried about this morning."

William Kept Them.
This morning, William N. Keppel, who said he had just arrived from Canada, was arrested on the charge of carrying, during his residence in the city, and he may do it again. He is said to be a member of a freight train. He thought he was going to make a living by the quality of horses he had, and went right for two days. David James, of the James Bros. grocery, and Herman Mayes, of the Mayes Bros. grocery, were left off with Keppel.

Chamber Meeting.
A number of chambermen will have a meeting tomorrow at 7 o'clock at the Chamber of Commerce, which has been using some of its meeting rooms for the past few days. The special committee on chamber affairs will also report.

Municipal Court Juries.
The municipal juries have been drawn for the grand jury, and the trial of the case on Saturday, March 21, the Juries to report and hearing, W. J. Hamby, D. Morrison, D. S. Energy, N. H. Hull, O. C. Johnson, W. E. Williams, W. E. Wadman, E. C. Blunt, J. A. Smith, G. C. Mason, Louis H. Lutz, N. C. Young, Ed. T. H. McCullum, G. T. Seymour, Morrison, A. M. Cox.

Tomorrow's Notice.
The notice tomorrow at the Lyceum, on the grand jury, has been issued, and the trial date set for Saturday, March 21, the Juries to report and hearing, W. J. Hamby, D. Morrison, D. S. Energy, N. H. Hull, O. C. Johnson, W. E. Williams, W. E. Wadman, E. C. Blunt, J. A. Smith, G. C. Mason, Louis H. Lutz, N. C. Young, Ed. T. H. McCullum, G. T. Seymour, Morrison, A. M. Cox.

Has Done Nothing Yet.
It is reported that the city has a man in the executive office of the Temperance Co-operation League, and he has complained against the law of the city, and the city has done nothing. Up to now, Mr. Holt had taken no steps to machinery of the law in this regard.

DESTROYER OF FRUIT

San Jose Scale the Subject of an Agricultural Department Bulletin.

WIDE SPREAD PEST

Seems to Be Extending Over Many of Fruit Growing States.

Washington, March 16.—The agricultural department has just issued a bulletin on the San Jose scale in 1896-97, prepared by Entomologist L. O. Howard. It is of much interest at this time, because of the recent edict of the German government prohibiting the importation of living plants, fruits, etc., because of the alleged discovery of the scale on ships entering German ports.

The present bulletin is supplemental to one on the same subject published in January, 1896, which contained a history of the Eastern occurrence of the insect down to Dec. 31, 1895, and concluded with the statement that it is still the only history of economic entomology in the United States has a single species of insect excited so much interest at San Jose scale.

In the bulletin we now know, the entomologist says, our actual knowledge of the distribution of the scale in the East in the fall of 1895, was comparatively small. It was then reported as occurring in the western states but in comparatively few localities in each, with the single exception of New Jersey. In 1896-97, however, the field inspection of the agricultural and horticultural departments of Maryland, Indiana, Ohio, Georgia, and other states, have shown that in these states the insect was nearly as widespread as in New Jersey, and twelve additional states have been added to the number containing infested states. In California, the insect is or has been generally distributed. The statements of the scale-kills fruit and it often seems to be destroyed by fungus disease, but neglected and improperly sprayed orchards exhibit trees in better condition as can be found in any of the orchards of New Jersey or Maryland.

Maryland—More actual damage seems to have been done in the state than in almost any other, and the scale has been in sixteen counties.

Pennsylvania—At the last publication of the former bulletin five localities were infested, six others, with slight infestation, have been discovered all except one in the southeastern portion.

Illinois—The scale was not known to exist in the state in 1895, but Professor Smith, by virtue of special appropriations has been able to have the state rather carefully inspected and has found twenty-two colonies in nine localities situated in eleven counties.

Michigan—This state, not known to be infested in 1895 has been found to have a number of infested localities in the southern half.

New Jersey—In his last bulletin Professor Smith made all efforts to extirpate the insect must be abandoned. In 1895 the scale was widespread and since that time the situation has not improved.

The pest was found in Lower Ontario in 1897, and the Dominion government is considering the question of legislation on the subject. A list of fifteen fruit and shade trees and ornamental shrubs affected by the pest is given. Considerable space is devoted to a discussion of the remedies suggested to kill the pest.

LITTLE FALLS ELECTION.

A Surprise For Editor Fuller—Results at Moorhead.

St. Paul, March 16.—A Little Falls, Minn., special to the Pioneer Press says: The following is the ticket elected yesterday: C. E. Vassar, clerk; Frank E. Hall, assessor; John McDonald; constable; F. B. Sturtz; alderman; First ward, E. C. Lane; alderman; First ward, J. Meusener; Second ward, J. H. Johnson; S. H. G. alderman; Third ward, long term, C. E. Carlson; short term, F. F. Turno. The newly-elected mayor, the clerk and assessors and aldermen, will be sworn in on Monday. The fight was one of the hottest in the history of Little Falls.

At Moorhead—Jacob Klafer, the citizen engineer, was elected mayor yesterday in a three-cornered contest by a plurality of 59. Keefer received 236 votes; A. G. Lewis, 126; and the runner-up, J. H. Flynn, 161.

The other officers elected are: O. E. Aahl, recorder; O. Thorstenson, treasurer; J. H. Sharp and P. C. Johnson, city judges; aldermen, L. F. Flinstad and George Porley; M. O. Wenzell and Henry Johnson.

NEW PRIMARY ELECTION LAW.

Chicago Democrats Much Pleased With Its Workings.

Chicago, March 16.—The new primary election law has been tested by the Democrats and found a success, all those who wished to vote being able to do so without interference. In large majority of the wards the primary election passed without disturbances, but in the Eighteenth, Twelfth and Sixteenth wards there was some opposition to preserving the peace. The total number of ballots cast in the city is estimated to have been 15,000, and in the words of the Democratic vote, the words of this morning, "There was no searching for a voter, when the negro wrested his revolver from him and shot him twice. Posses are in pursuit of the murderer."

AN ICE COMBINE.

Columbus, Ohio, March 16.—The Tri-State Ice Manufacturers' association is in session here today taking steps to extend its organization into what will be known as the Northern states. This morning Columbus was searching for a voter, when the negro wrested his revolver from him and shot him twice. Posses are in pursuit of the murderer.

A POLICE EMBEZZLER.

St. Louis, Mo., March 16.—J. E. Hickey, ex-treasurer of the Pacific Railroad company, and a member of the St. Louis police force, today pleaded guilty to the charge of embezzling \$9000 from

DEMAND INDEMNITY

Fourth Auditor Morris Says That Is What the President Will Do.

MAINE'S SURVIVORS

Many of the Sailors on the Ill-Fated Ship Were Foreigners.

Chester, March 16.—Frank H. Morris, fourth auditor of the treasury, and a personal friend of President McKinley, who is at present in Cleveland, speaking of the Cuban question, said:

"The war preparations are just what the country needed and has needed for twenty years. Many of our ports have

been almost entirely defenseless, but this is being remedied in a rapid manner now.

"In a short time we will be fully prepared to meet any invasion from foreign country."

"Whatever the agency was, the officials at Washington are positive that the Spanish government has been

keeping up the war, and hope is expressed that the United States will not suggest

any inferior substitute for the sake of a little extra selfish profit."

A man or woman who neglects

constitution, still has a right to sue for damages," said Mr. Morris.

All medical dealers sell them,

No other pills are "just as good."

STRANGE AFFAIR.

Mrs. Nellie Wombacker Found Dead—May Be Suicide or Murder.

Minneapolis, Mar. 16.—A woman who gave her name as Mrs. Nellie L. Wombacker, of this city, was found dead in the Hotel Vendome yesterday. It is thought to be a case of suicide, but there is no evidence of it, and judging from the woman's condition, she had not been ill.

The woman was staying at the hotel, which would call forth at this juncture the great potential military strength of the United States.

Secondly, she has been a cheap actress.

Thirdly, she is a foreigner.

Fourthly, she has been ill.

She was found lying on the floor of her room, with her head against the wall.

Her body was cold, and there was no pulse.

Her eyes were closed, and she was breathing.

Her hair was disheveled, and she was

clad in a nightgown.

Her hands were clasped over her heart.

Her feet were tucked under her.

Her mouth was open, and she was

breathing.

Her hands were clasped over her heart.

Her feet were tucked under her.

Her mouth was open, and she was

BUSINESS MEN MEET

They Take a Stand Against the Work of Temperance Co-operation.

About twenty-five Superior street business men gathered in L. Mendenhall's office yesterday to discuss the Civic Temperance Co-operation and the crusade which it is endeavoring to make against the saloons of the city. These business men think that the purpose of the mayor in respect to the saloons is the same as the object to the rigid regulations which Mr. Holt and his co-operation desire to have enforced. They present demands that they be carried out in the interest of the city and drive much of the business of the city and drive much of it away. They think that to have constant agitation and turn out meetings is a good idea, etc. They say that the city is well governed as it ever was and a good deal better than it has been at some time and that it is a good idea to let well enough alone.

A committee was appointed to wait on the mayor, and they will call on him to-morrow and present their demands. This committee consists of the pastor of the First Congregational Church, Dr. J. A. Edgerly, Dr. W. T. Clara, Ethel and Mrs. J. L. Thomas of Duluth, and George H. of Tacoma. Mrs. Edgerly, Mrs. H. C. Richardson, deceased, was her daughter.

CASE IS IMPORTANT.

Manufacturers' Bank Suit Involves Other Cases Against Bondsmen.

The stockholders' liability case of C. E. Pease, as receiver of the Manufacturers' Bank, against the stockholders of that institution, was ended this morning and taken under advisement by the court. The case involved the question of whether the bondsmen had breached their fiduciary duty to the bank.

The court adjourned the case until June 1st.

The stockholders' liability case involved the question of whether the bondsmen had breached their fiduciary duty to the bank.

H. R. ELLIOTT & CO.

TO BLOW UP LAREDO.

Spanish Residents Said to Be Hatch-
ing a Plot.

Laredo, Texas, March 17.—On several occasions since the blowing up of the Maine anonymous letters have been addressed to Mayor Christie of this city, warning him of a plot outlined by the Spanish residents and Northern leaders. On March 10, he got up the following statement: "There should be no hostility act between the United States and Spain. Little heed was paid to the warnings, but an anonymous letter, containing a similar message, has just been received and has caused considerable comment, and the mayor has ordered the arrest of all suspicious characters.

FISHING SMACK SEIZED.

Spanish Craft Gets into Trouble at
Punta Gorda, Fla.

Punta Gorda, Fla., March 17.—The Spanish fishing smack Carmen has been seized by the Foreman for violation of the navigation laws.

A boat came to Charlotte harbor the Foreman came upon the Carmen at anchor, making preparations to put to sea. Capt. Rogers sent an officer on board the Spanish and, ascertaining that the Spanish had been there for more than twenty-four hours without according to the customs authorities, placed the Carmen under arrest. The Foreman took her to the port and turned her over to the deputy collector of customs.

The latter officer placed a watchman aboard and issued instructions from Washington. The Carmen had live and salted fish aboard, the result of their catch since leaving Havana, where the vessel was owned. Her owner, who says he has only been engaged in fishing around the Tortugas and the waters of Florida, had cleared the port several days ago and put into Charlotte harbor on account of stress of weather.

MACKAY'S PRE-NUPITAL TRIP.
New York, March 17.—Clarence Mackay and his party of eight, including his fiancee, Miss Katherine Drexel, will start on his deferred pre-nuptial

trip Saturday. This will be one of the most luxuriously appointed pleasure trips of the year. Mrs. Richard Irving will chaperone the party, which will include Daniel Drexel, Miss Mary Gresham, Miss Virginia Fair, Reginald Reynolds and Philip Lydig.

RED RIVER COLONY.

Three Hundred Families Are Coming
From Venezuela.

Washington, March 17.—(Special to The Herald)—Immigration Agent Grygia of the Northern Pacific railroad arrived here today. He has been in the East for some time organizing a party to form a colony in the Red River valley, and now has 300 families ready to leave for Minnesota. They are all experienced lumbermen and have money to burn homes and support themselves until one crop can be raised. Most of them are from Pennsylvania.

LUMBERMEN FEEL GOOD.

Note a Great Improvement in Their
Business.

Washington, March 17.—(Special to The Herald)—T. H. Shevlin and J. A. Nash, prominent Minnesota lumbermen, are here on their way home from Florida. They say their firms represent a great improvement in the lumber business in the Northwest, and predict a large influx of immigrants to that section in the spring, which will increase the demand for timber.

Representative Tawney is preparing a substitute for the pending pure fish bill. It will be less harsh than the pending measure, and will merely provide for a nominal tax to deter the expense of enforcing the law.

A DRUGGISTIC DRAW.
Columbus, Ohio, March 17.—David Seydel, weight 124 pounds, began Galagher weight 121 pounds, began here for \$300 a week. The Marion Club each man was fresh. Weighted and waved, Jack Canton, referee, decided the contest a tie. There was some hard fighting, but the police made the affair tame to what it would have been.

WEYLER URGED
THE EXPLOSION

Sensational Letter Written By Weyler When
It Was Proposed to Send the Battle-
ship Maine to Havana.

REPORT OF BOARD READY

Has Been Transmitted to Admiral Sicard and
Now on the Way to Washington
—Secrecy is Preserved.

New York, March 17.—The New York Journal this afternoon prints a statement written by Hon. E. LaLime, the newspaper correspondent recently arrested and searched by Spanish officials in Calvatas prison, Havana, and later expelled from the island. This is the opening of the LaLime statement:

On Jan. 24, at 10 o'clock at night, I met in the Cafe Inglaterra, the headquarters of the reporters in Havana, Francisco Diaz, a reporter of the rabid Spanish paper, La Union Constitutional, at whom I frequently exchanged news. On asking him if he had any news, he said, "Yes, we have a pocket a letter and handed it to me." Weyler wrote this letter to Santos Guzman, who sent it to New (the editor of the Union Constitutional) for him to read and publish. The letter was written by Weyler of the candidacy of the battleship Maine to the Havana for the proposed trip to Havana.

PULLMAN MARRIED

Walter Sanger Pullman Marries Miss Louise Lander West In Oakland, Cal.

VERY QUIET AFFAIR

The Bride Is a Young California Lady, Daughter of a Forty-Niner.

San Francisco, March 17.—Walter Sanger Pullman, one of the twin sons of the late George M. Pullman, the palaeo car magnate, was married yesterday to Miss Louise Lander West, of this city. The unexpected alliance of one of the heirs to the Pullman fortune took place at the home of the Rev. John Baker, rector of Trinity church on Telegraph avenue, Oakland.

Late yesterday afternoon, Mr. Pullman, unaccompanied, made his appearance at the country clerk's office in the municipal court house.

He made application to Deputy County Clerk Mason for a license to marry. His bride, Miss Louise Lander West, aged 22, and at present a resident of the city and county of San Francisco. The name of his intended bride he gave as Louise Lander West, native of California, aged 24 and a resident of the city and county of San Francisco. The license was granted and the marriage sealed.

Mr. Pullman rejoined Miss West, taking in a carriage they drove to the home of the clergymen, who performed the ceremony. The bridegroom, who is the clergymen's wife and a Miss Robins, a friend of Mrs. Bakewell, acting as witness.

At the ceremony the couple went away as quietly as they had come, without making explanation or leaving any address and the clergymen was in ignorance of the identity of the couple he had married.

The acquaintance of the young people is almost of a few weeks' standing. Mr. Pullman is residing at the Palace with her sister, Mrs. Hugh McDonnell, a daughter of the late Chester H. West, who was a noted man here, having made the trip around the Horn with the earliest gold seekers. He became a banker in this city and was at one time very wealthy. He died last year, poor, and his daughters made their own way in the world, teaching in the public schools. His son, Walter, is a young Pullman's brother-in-law, a young mine owner of New York city.

The late Gen. Frederick Lander of an uncle of Miss West. There are two other brothers, Judge Edward Lander of Washington, D. C., Mrs. Pullman, the bride of the young Chicago millionaire, is of medium height. She has a profusion of reddish hair, blue eyes, long black eyelashes, and an attractive face.

POSTAL FACILITIES.

Senator Allen Proposes an Amendment to Postoffice Bill.

Washington, March 17.—Senator Allen has proposed an amendment to the post-office bill appropriating \$100,000 for continuing necessary and special facilities on trunk lines from Chicago to Omaha, and Lincoln, Neb., and all points westward. No part of the appropriation is to be expended unless the postmaster general shall deem it necessary to the postal service and it is believed that the provision is to be expressly stipulated that all through mail arriving at Chicago and bound West shall be carried the year in which it can reach Chicago. It will be transferred on trunk lines from one carrier to another, without being handled by carriers, wagons or otherwise from one station to another.

HERMAN LIEBES' WILL.

His Two Daughters Are Cut Off With \$10 Monthly.

San Francisco, March 17.—The will of Herman Liebes, of the North America Company, has been filed. No value is placed on the property. George Liebes, wife, Liebes, sons of the deceased, and Isaac Liebes, his cousin, are named in the will as executors and trustees. When the final account is to be taken years hence, the greater part of the property will be divided equally among the three sons, who are trustees, and a fourth son, Edward Liebes.

The two daughters, Leonie Liebes and Else Liebes, will get nothing, because, it is said they have already been amply provided for by their settlement with their mother. Each will, however, receive monthly, until she is married, the sum of \$10, to be regularly paid to her by the trustees. Many bequests of small amounts are made in the will.

MINNOSA AT OMAHA.

State Commission Has Secured 5000 Feet of Space.

St. Paul, March 17.—The Minnesota commission, having in charge the arrangements for a state exhibit at the exposition at Omaha, was in session yesterday. The meeting was called to hear the report of the committee that recently visited Omaha.

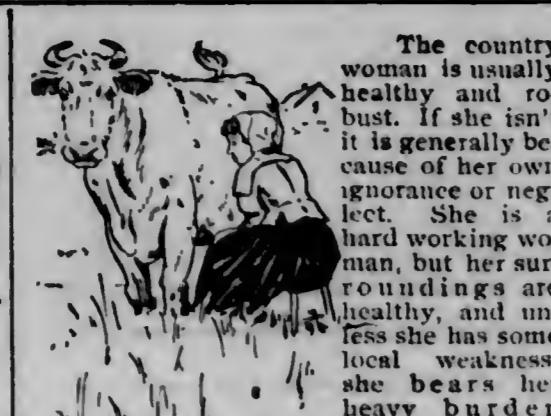

Before returning the members of the committee obtained an option on 5000 square feet of space in the various buildings.

An important feature of the day's meeting was the appointing of the following committees: Finance—W. D. Kirke, E. J. Phelps, W. J. Foster, Mines and Minerals—L. G. Sresovich, C. H. Jones, A. T. Stebbins, Dally and Bee Industries—A. T. Stebbins, Manufacturing—F. E. Salisbury, W. W. Hoffmeyer, J. L. Rich, American Linen, George Purvis, F. H. Peavey, John L. Bernard, State Building—J. N. Lind, L. C. Pease, C. P. Noyes.

In raising funds necessary to carry on the work was the impression that there would be no difficulty. Blue Earth county is the first county of the state to give assurance that the amount of the amount will be forthcoming. These assurances were conveyed to the commission through Senator George Harmer of Mankato. Blue Earth county's quota is \$574.66.

BIG GOLD IMPORTATION.

San Francisco, March 17.—The steamer Alameda, now on her way

A FIERY DIPLOMAT

Baron Von Hengervar, the Austrian Representative, May Get His Passports.

A DIPLOMATIC ROW

Austrian Got Excited Over Cuban Matters and Abused Judge Day.

New York, March 17.—A dispatch to the World from Washington says: "The story is circulated here that Ladislaus Hengervar, Vis. Hengervar, the minister of Austria-Hungary, is in the most severe of tempers and is extremely remiss in his duties. He has been making them strong, healthy and vigorous. It cures all weakness, disorders and diseases of the human organism. It is the greatest of all nerve tonics. It banishes the discomforts of the period of sedentary life, and makes babies eat and grow well. If she suffers from local weakness and disease, if she suffers from this way, she staggers with a weak, sickly nervous complaint invalid. Dr. Pierce's Favorite Prescription cures all weakness and disease of the organs definitely remiss. It acts directly on these, making them strong, healthy and vigorous. It cures all weakness, disorders and diseases of the human organism. It is the greatest of all nerve tonics. It banishes the discomforts of the period of sedentary life, and makes babies eat and grow well. If she suffers from this way, she staggers with a weak, sickly nervous complaint invalid. Dr. Pierce's Favorite Prescription cures all weakness and disease of the organs definitely remiss. It acts directly on these, making them strong, healthy and vigorous. THE WEATHER.

United States Agricultural Department Weather Bureau, Washington, Synthesis of weather conditions for the twenty-four hours ending at 7 a. m. central time, March 17.—The storm which now appears as a moderate barometric depression east of South St. Marie, and which the barometer has shown to be high pressure that extends from the far Northwest to the Ohio valley, will move westward, separating districts with lower temperature than obtained yesterday morning. The snow in some portions of Minnesota and the adjoining Canadian provinces the temperature has fallen 20° to 25° below zero at 7 o'clock this morning, light snowfalls have been reported in the Canadas Northwest and in Montana and Wyoming, during the last two or four hours.

Minimum temp. last night:
Duluth ... 15° Belmont ... 20°
Duluth ... 16° Prince Albert ... 20°
Montreal ... 20° Swift Current ... 19°
Montreal ... 18° Red Deer ... 18°
Port Arthur ... 16° Hemlock ... 12°
Winnipeg ... 18° Bismarck ... 12°
Hudson Bay ... 18° Fort Vermilion ... 12°
Rapid City ... 15° Moosehead ... 12°
Huron ... 18° St. Paul ... 12°
Montreal ... 18° Fort Garry ... 12°
La Crosse ... 18° Milwaukee ... 14°
Detroit ... 18° Chicago ... 14°
Duluth ... 18° St. Paul ... 14°
Denver ... 18° Omaha ... 14°
Minneapolis ... 18° St. Louis ... 14°
Duluth ... 18° Minneapolis ... 14°
Land ... degrees below zero.

Duluth temperature at 7 a. m. today, 22° minimum yesterday, 16° minimum yesterday, 20° today. Wind and drizzle; probably falling to 18°. Windy with mostly sunny temperature and westerly winds becoming variable.

Local Forecast Official.

Chicago, March 17.—Forecast until 8 p. m. tomorrow: Fair to Wisconsin; fair to Michigan; cold and drizzling; probably falling to 18°. Windy with mostly sunny temperature and westerly winds becoming variable.

Local Forecast Official.

Chicago, March 17.—Forecast until 8 p. m. and Friday; cold in one portion; moderate in another; variable in Minnesota; fair tonight and Friday; colder in east portion tonight; variable winds.

TIME TO END IT ALL.

A reader of "The Herald" writes as follows: "In your editorial of Tuesday, 'The Venerable Remond,' you very properly criticise a class that affects a love of literature and music. There is another class equally reprehensible, and very much in evidence just now, that ought to be mentioned in the above connection—it is share patriotism. Without waiting until it shall have been determined that this country has a valid cause for war with Spain, a certain element has been shouting hysterically for blood. But the only shouting this class ever does is to shout off their mouth. When the terms of actual war exist, and unflinching heroism is required, it is the quiet, level-headed, unostentatious patriots that are found in the vanguard of battle, while the noisy, share patriots are slinking to cover; then the veneer is stripped off and the hollowness of their pretensions exposed."

The Herald does not believe that the writer of the above does justice to the sentiments which animate the great majority of the people whom he describes as "share patriots, for blood." The writer's sentiment until it shall be determined that this country has a valid cause for war with Spain, seems to talk this way may not be inspired by patriotic motives, and would shrink to cover if the president should call for volunteers for a war with Spain, but they are insignificant in number, in comparison with the vast majority of the American people who are demanding that the president shall act without delay to put an end to the horrible state of things which exists in Cuba. The policy of delay, of disregarding the butchery of the unfortunate Cubans, of permitting the sordid interests of Wall Street to outweigh the cause of liberty and humanity, does not meet with the approval of millions of loyal, patriotic Americans who love liberty and have hearts which bleed for the woes of the unfortunate Cuban, condemned to death by the slow prows of starvation, or the quicker effect of disease brought on by Spanish cruelty and barbarity. These Americans are not share patriots."

"A valid cause for war with Spain" still remains? Good heavens, what would the writer of the above letter and those who evidently like him, are for peace at any price, have Spain do to furnish a valid cause? Look at the situation, as portrayed by an exchange: Within five hours' sail of our shores, lame women and children are dying by thousands. Every wind that blows from the desolated island brings the sound of their appeals for mercy. Skeptical Americans go to Havana prepared to find that the suffering of the Cubans has been overdriven. They return wondering that the most horribl-

tales have been so conservative. Every day the president sees on his table the record of ruin and slaughter prepared by trusted officers of his own government. Every hour he hears reports that, if carried out of Armenia, would have compelled the fear-harassed cabinet of Europe to destroy the sultan of Turkey. Yet he waits, waits, waits, while murder thrives and death in its most hideous form reaps a harvest unparalleled in history.

It is share patriotism for the American people to demand that these horrors be brought to an end, even if it be necessary to declare war against the Spanish butchers? Thank heaven, the Turks and the Hessians are few, and their numbers are steadily decreasing. The masses of the American people, the honest, patriotic, liberty-loving American people, not looking for any further "valid cause" for war with Spain. The cause exists. The time has come to act, and unless the administration takes the first step by recognizing the independence of the Cuban people, progress will be forced by the humane and patriotic voice of the people to take a situation somewhat different from that advocated by the politicians.

Philadelphia is rapidly earning the reputation of being a very wicked city. First came the expense by a committee of ministers that the Quaker City's tenderloin is worse than New York's, then a Philadelphian bumbo steer illustrated, a New York saloonkeeper, and the latest is a sensational history investigation in the city council. Miss Philadelphia is not as show as she was, but she is generally believed that a place on the fusion ticket can also be secured by a Duluth man. Probably the fusionists will be willing to give Duluth a place on their state ticket, preferable one of the candidates for associate justice of the supreme court. There are now two candidates in the field here for this nomination. Undoubtedly, the Democrats, Populists and Silver Republicans will again unite on a fusion ticket, and it is very generally believed that a place on this ticket can also be secured by a Duluth man. The fusionists are to be advised that the fusion ticket will be successful this year, it is highly desirable that the Duluth candidate should be a man of superior ability and fitness for the position for which he may be nominated.

Several names have been suggested in connection with the fusion nomination for Judge. Recently there has been considerable talk in regard to the peculiar fitness of S. T. Harrison for this place. If he should be the choice of the fusion conventions and should be elected, Duluth would certainly be fortunate in its first representation on the bench of the supreme court. Mr. Harrison is evidently equipped for the highest court in the state. He is a jurist of acknowledged high ability, and it is believed by his many friends that he possesses all the qualifications to make a judge of whom the whole state would be proud. Mr. Harrison is a Democrat and is an earnest believer in socialism, and is consequently in thorough accord with the principles upon which the three fusion parties are united now and will be united in the coming campaign. As far as Duluth is concerned, however, his strength would not be confined to the silver ranks. He would poll hundreds of Republican votes, and his well-known ability as a lawyer and his special fitness for the bench would give him very general support from the profession throughout the state. He would add strength to the supreme court, and his decisions would command the respect of the people generally. The Herald does not know whether he would accept this nomination. It has made no effort to ascertain his views on the subject, but having heard his name mentioned, it cannot rest from impressing upon the reform forces the fact that his nomination would add strength to the ticket, and that his election would place upon the supreme court bench one who is well versed in the law, who possesses the judicial temperament which is essential to a clear, logical thinker and who is in thorough sympathy with the objects of the reform forces.

AN ESTIMATE OF VAN SANI.
The following is a description by a Republican newspaper, the Sleepy Eye Dispatch, of the man who will be nominated by the Republicans for governor this year:

"The Van Sani men come with hollowed words in their mouth and say: 'Van isn't in the lead.' Van could not consistently refuse the support of any one. 'Van hasn't made any pledges, and he's not in all right.' The feature of these representations is their falsity. The truth is that every nomination to be made at the coming state convention is already parcelled out—the appointment with their fat salaries are pledged and machine manipulations are going around the cities offering to bet that Van Sani is going to be nominated by acclamation. Who is the man that is to receive this honor? Is he a great genius? A man of more than ordinary ability? A statesman? A man the peer of his fellowmen? No. There are great men in Minnesota who are greater geniuses; have more ability; surpass him in statescraft; and a half million men who are equals in manliness, patriotism and integrity. Then why select him above all others as the chief executive of the state? Because Van suits the lumber barons, the great railroad kings, the vast corporation managers, and with these interests it is the people he d-d."

MUSICAL CULTURE.
An editorial article in the News Tribune this morning said: "We believe there are more good musicians and more persons of musical culture in Duluth than in any other city of like size that we have made acquaintance of. But we recall no community of its population in which there is less general appreciation of good music."

On the same page, noticing the Hooper concern last night, the musical critic of the News Tribune said: "The orchestra played a selection from 'Pagliacci' and if Mr. Flauton coured comparison with the late performance of the same composition by Signor Tag-

iapietra's band of Mexicans, the coming was not in vain; for Mr. Flauton's men gave it ten times the effect. The lack of brass in the Mexican orchestra renders its efforts inadequate; brass is as necessary as string or woodwind."

Mr. Flauton's orchestra will be surprised to learn that they played a selection from "I Pagliacci." It is true that the program announced it, but what they did play was a selection from "Cavalleria Rusticana," and it is astonishing that any person possessing musical culture should not have recognized it.

It is share patriotism for the American people to demand that these horrors be brought to an end, even if it be necessary to declare war against the Spanish butchers? Thank heaven, the Turks and the Hessians are few, and their numbers are steadily decreasing. The masses of the American people, the honest, patriotic, liberty-loving American people, not looking for any further "valid cause" for war with Spain. The cause exists. The time has come to act, and unless the administration takes the first step by recognizing the independence of the Cuban people, progress will be forced by the humane and patriotic voice of the people to take a situation somewhat different from that advocated by the politicians.

Chicago Tribune: "If mother's remark is to be believed, the Illinois will be afraid to go to the Klondike in war time, and they will be the last to leave."

Desert Journal: "The most popular Dyke—No, not merely a regularization, I assure you."

Chicago Record: "What is a figure of speech?"

EVERYTHING UP TO DATE AT VERY MODERATE PRICES.

How to Find Out!

You are wondering what to get for Spring! Take a half hour to see what we have to show for this particular Spring—1898.

You are under no obligations to buy. If you've made up your mind beforehand not to buy, come in all the same.

If you've made up your mind to buy elsewhere, still come in.

We'll show you everything. We want you to see it. The fact that you've made up your mind beforehand shows that you have done something about your clothes. You shall do more—if you come; and you shall be better able to suit yourself.

We shall be glad to have every man that has made up his mind make use of our store—call it a school, if you like. No school was ever freer.

We don't intend to let any man in this town be a stranger. Don't wait—come today.

Look at Furnishings, too. The rule is the same. Your money back if you want it.

M. S. BURROWS,
CLOTHIER, HATTER, FURNISHER AND SHOEIST.

Has Charge of the Mines.
Robert H. Flaherty, bat portage, was born yesterday. When the old miners of the Burley Mining Company dismissed J. Burley Smith, Mr. Flaherty was summoned East. He did not know when he was up and when he had been called when he reached Duluth he was taken into a meeting of the company given a hearty vote of confidence and was given a commission given him which placed him in sole charge of both the Burley mine and Yum Yum. Mr. Flaherty came back to Duluth and Chippewa Falls today to meet with Mrs. Flaherty, who will spend the summer with her husband.

Purest on earth. Solon spring water. New York, \$14. "Omaha road."

There Is Not a Woman That Lives

Who is not looking for bargains. There is not a thrifty housekeeper in Duluth.

That Does not Read The Grocery And Meat Market Advertisements In The Friday Herald...

JOHANSON WILL LECTURE.
Will Give an Illustrated Talk on the Klondike.

Even since Carl M. Johanson returned from Dawson City many people have urged him to give a public lecture on what he saw and learned during his trip to the Klondike. After due deliberation he has decided to do this, the amount of time not yet well known, will be chosen. Efforts are being made to secure the High School Assembly Hall.

His trip in and out of the Klondike. His experiences with the Indians. His carried a load and White passenger. He carried a load of all kinds of scenes and photographs of the frozen land. A number of the men of Duluth men and especially interesting on that account. Close to 100 of these will be used in his talk. The lecture will be illustrated by them. He is a graduate of Cornell University, a class observer, an adventurous traveler, and also being well known in Duluth, his talk will have attraction for a large number of people.

Three Crooks at Work.

As surely as spring follows winter so does the industrious baneo man follow the general arrival from the Twin Cities a few days ago. They had scarcely reached Superior street when one or two were seen on the sidewalk near the two crossed over. Presently along came Mr. Lumber Jack and his friends, "Bank" No. 1. Stopped them and asked them if they had any gold with them. As he had just struck the city and was stone broke. Just then the other two came up and remonstrated with him for not having so much upon the watch and proceeded to employ their usual tactics to palm off a watch for \$10. Just then a police officer, Mr. Durante, came up the street. They were afterwards seen infesting the Burley saloons and will no doubt be heard of again before they leave the city.

Address to Pastors.

Mrs. R. E. Holt, county president of the W. C. T. U., has addressed the following to the pastors of St. Louis country:

The last official act of Frances E. Willard, was to sign a call for the observance of Neal Dow's birthday, March 20, by temperance workers. Since Mr. C. T. U. have requested that the day be observed as a memorial day for our late leader and president, but has not done so, she has written to the pastor in this city, the county W. C. T. U., respectfully suggests that pastors observe the day by speaking on some phase of the subject, thus honoring the memory of Neal Dow and Frances E. Willard.

New York, \$14. "Omaha road."

Patrick's Telegram.

E. W. Burroughs, Jr., was at the Spalding one day this week and he showed Clerk Roslemon that he had just received a telegram from his wife to say that his name was getting up on them and if any more men were wanted, and this is the reason he received his wire.

Mr. Durante, St. Paul, ten men right away. Never mind, five will do.

Is From Duluth.

Rev. A. L. Elchert, a pastor of the Oneida M. E. Church and also a first class student at Hamline university, has gained the first prize for oratory and composition at the Hamline. Mr. Elchert is the son of Mr. and Mrs. Albinus L. J. Elchertson of the Seventh ward, who naturally feels proud of his son's success. Mr. Elchertson, who has worked his way through college, will graduate this year.

Do You Want the Best?

If so, on your next night trip to St. Paul or Minneapolis take the "Omaha" train. Gas lighted, steam heated, sleepers open at 9 p.m. Reservations at 405 West Superior street.

New York, \$14. "Omaha road."

IS ON THE WAR PATH

Charles Evans Holt Causes the Arrest of Several Saloonkeepers Today.

STILL AFTER BOYLE

Will Prosecute the Policeman For Drunkenness—Al Wagner Arrested.

Charles Evans Holt's war against the saloonkeepers goes merrily on. At 11 o'clock this morning at 208 South Fifth avenue west, and Martin Smith, of 109 West Superior street, were arrested this morning and arraigned before Judge Edison Drager on the charge of keeping open after 11 p.m. and Smith on the charge of keeping open on Sunday. Both pleaded not guilty, and their trials were set for Wednesday morning. They were released on their recognizances.

Mr. Holt was not satisfied with the mayor's finding, admitting Officer Boyle as a responsible authority and demanded his immediate removal to have Mr. Boyle arrested and tried on the charge of drunkenness. The mayor said that Mr. Holt was allowed to speak in that manner to him. He said that he sent for Mr. Holt's witnesses to appear at the hearing before him, but they failed to respond. The mayor said he made more difficulties in Mr. McKay, who testified in the officer's behalf at the hearing than in all of Mr. Holt's statements.

It is believed later that a charge of drunkenness would probably be entered against Officer Boyle this afternoon.

A warrant was issued for Mr. Wagner this morning, on the charge of compiling liquor without a license. The complaint says that Mr. Wagner is ostensibly the owner and manager of the place at 109 West Superior street. The license is in the name of T. B. Rieckford. The transaction complained of is the sale by Wagner of beer to a guest of Mr. Holt on March 16. The intention is in this case to test the question of the right to conduct a saloon under a license issued to another.

It is said that the Co-operation intended to take steps to have the license issued to him for the sale after an application for a license has been put in and the money deposited and before the license is issued.

BERT COSTELLO DEAD.

Died in Chicago Today From Effect of the Operation.

A telegram was received today announcing that Bert Costello died this morning in Chicago. He had been ill for several weeks, having been admitted to the hospital at the corner of Superior and Second streets, while the two crossed over. Presently along came Mr. Lumber Jack and his friends, "Bank" No. 1. Stopped them and asked them if they had any gold with them. As he had just struck the city and was stone broke. Just then the other two came up and remonstrated with him for not having so much upon the watch and proceeded to employ their usual tactics to palm off a watch for \$10. Just then a police officer, Mr. Durante, came up the street. They were afterwards seen infesting the Burley saloons and will no doubt be heard of again before they leave the city.

Will Remove the Winnipegs.

Mad. Sears has let the job of removing the sunroom, steamship "Winnipeg," to Mr. L. H. Innman. He takes the job at a figure several hundred dollars less than the lowest bidder, whose figure was \$1700. Another service which is offered is to put the government machinery. There is not likely to be very much of this except possibly some machinery. It is probable that the boat will be blown up and destroyed and the timber will be used for fuel.

The funeral will be held at Graceville, Minn., where the body will be taken. Mrs. Costello will go to Minnesota, where she will remain until the funeral.

She will meet her with the body, and they will inter her with the body, and they will go to Graceville.

Does Not Look For War.

R. Silberstein returned yesterday after a few weeks absence in the Eastern markets. Mr. Silberstein had been ill for several weeks, but had recovered and was able to return to his business. The telegram contained no information more than the mere announcement of his death, but was probably due to the short notice given to the newspaper.

The funeral will be held at Graceville, Minn., where the body will be taken. Mrs. Costello will go to Minnesota, where she will remain until the funeral.

The funeral will be held at Graceville, Minn., where she will remain until the funeral.

MONEY TO LOAN.

We have several thousand dollars to loan for Eastern real estate.

RICHARDSON & DAY.

CHARGES CROOKEDNESS.

Creditor of Tessman & Belliveau Petitions the Court.

The Hubbard Tea company, one of the creditors of the insolvent, commission firm of Tessman & Belliveau, this morning in district court a petition asking the court to order the insolvents to make disclosures as to what they have done with their property and also to furnish credit to the plaintiff in the distribution of the assets without filing releases of their claims. In his petition he makes some interesting charges against the insolvents.

He alleges that they have concealed from him the assignee a large portion of their property, and evidence of property of his amount and value, and defrauded their creditors, and that they have removed the property of the state. He also alleges that in January, 1897, they defrauded him of his rights in the commercial agencies for the purpose of getting credit, to the effect that their assets were not worth the liabilities and that it is alleged that these statements were false. It is also alleged, upon information and belief, that since last September assets amounting to \$10,000 were taken from him.

It is also alleged, upon information and belief, that since last September assets amounting to \$10,000 were taken from him.

It is also alleged, upon information and belief, that since last September assets amounting to \$10,000 were taken from him.

It is also alleged, upon information and belief, that since last September assets amounting to \$10,000 were taken from him.

DULUTH EVENING HERALD.

FIFTEENTH YEAR.

FRIDAY, MARCH 18, 1898.

FIVE O'CLOCK EDITION.

TWO CENTS.

Is It As Pleasant

For you to hear as it is for us to tell of

OUR NEW SPRING ARRIVALS

In Men's Gentle Spring Wear,
Boys' Gentle Spring Wear,
Children's Gentle Spring Wear?

It's we're glad, for never has the old store been more abloom with natty newness. Take a look through. Glad to show you.

Spring Suits Are here, plenty of them. New textures, new patterns, latest with faultless finish, made by master hands at the business. Blacks, blues, browns, grays, mixtures, plaids, checks or stripes, best of cloths—a goodly array. Prices \$10.00, \$12.00, \$15.00, &c., by easy stages up to \$25.00.

Spring Overcoats Are here. The regular new coats, a prime necessity for every man's wardrobe. Just the thing to ease you from your heavy weight, none at all. Elegant garments in fair tailoring, linings, styles, etc. It takes quality to us; our labels—costs no more to wear. The nobby new Coverts, also wonders at \$10, \$12, \$15 and \$18.

Hat Leaders This Year.

We are at the head in hats this season.

Showing many, selling many.

THREE TRIUMPHS IN HATS.

"STETSON." The leader this year. Price—\$3.50, \$4.00, \$4.50, \$5.00.

"GORDON." The favorite this year. Price—\$3.00.

"GUVER." The standard this year. Price—\$3.50 and \$4.00.

Gap the climax of your dressiness by donning one of our new Spring Hats.

Spring Shoes Are Here. We devoted careful attention to this department this spring—bought leading styles, exclusive styles; those not equaled anywhere for shapeliness and comfort and wear.

Prices lower than you pay elsewhere. Prices—\$3.00, \$3.50, \$4.00 and \$5.00 for Men's High Grade; good shoes for \$1.50, still better for \$2.00 and \$2.50.

Elegance in Neckwear.

Late arrivals from New York are exceedingly attractive, beautiful but not "loud," rich but not "gaudy." Essentially the neckwear of the fashionable man. Prices see, \$5.00, \$6.00 and \$7.00, surprisingly fine. Neckwear at \$2.00.

Never see anything but smiling face leave this store.

Store open till 10:30 tomorrow night.

Men's and Boys' Outfitters. **Big Duluth** W. Superior St.

WILLIAMSON & MENDENHALL.

CRESCENTS....
There are several good bicycles on the market, but the regular Crescent at \$30 and the chainless at \$75 are the most popular wheels in the world.
GORDON.

HOPEFUL FOR PEACE.

BRITAIN HAS NO DESIGNS.

United States' Claim on Hawaii Fully Recognized.

London, March 18.—The government of Great Britain is surprised at the joint resolution of the senate for the annexation of Hawaii, setting forth that Great Britain was plotting the absorption of Hawaii.

The government of the house of commons says it seems improbable that the senators would make official statements on my other basis than rumors and not facts. As far as I am concerned, there is further from Great Britain's intent to than to interfere in any way with the existing regime in Hawaii. No one in the country, however, can doubt that direction will be given to the government to do what it can to assist the United States in its efforts to annex the island.

Franklyn Lee, editor of the *Advertiser*, said to the press: "I am sorry to find that the government has recognized the independence of Cuba. And in this case, it is to be found in the eyes upon which the United States has its main hope of success."

This is the most important development which has taken place since in Cuban question assume an acute form.

FRANKLYN LEE DEAD.

Editor of the Rush City Post Died Today.

St. Paul, March 18.—Franklyn W. Lee, editor of the *Rush City*, Minn., post, known throughout the Northwest as a prominent writer, died yesterday morning. His death came suddenly, and at his home early today.

Mr. Lee was a worker on the St. Paul newspaper for several years on the news staff, and afterwards on the advertising department, remaining in the latter until he bought the post at Rush City. He had a wide circle of friends, and his early death will be widely mourned.

ALTERATION OF FLOUR.

Towney's Bill Would Tax It Four Cents.

Washington, March 18.—(Special to The Herald)—Representative Towney today submitted the substitute bill he has prepared to prevent the adulteration of wheat flour to the commissioners of Internal Revenue. The bill, which was introduced in the House of Representatives yesterday, provides that no flour shall be admitted into the country unless it is accompanied by a certificate of analysis issued by him. His proposal to require a full examination of flour by the Bureau of Chemistry is to be submitted to the Senate by the House of Representatives.

Mr. Towney's bill, however, does not provide for the protection of the interests of the flour millers, who are to be taxed heavily. The bill, however, does not provide for the protection of the flour millers, who are to be taxed heavily. The bill, however, does not provide for the protection of the flour millers, who are to be taxed heavily.

PROMINENT MAN DEAD.

Cleveland, March 18.—Moses Black,

a prominent young attorney and name

in the law, died this morning, after

an attack of peritonitis. He became ill

on Saturday evening, and was admitted

to the hospital, where he died this

morning. His death occurred at 12 m.

RUSSIAN SPY CAUGHT.

Birmingham, Eng., March 18.—The German spy, who recently stated that a Russian spy, in the guise of a woman, has been discovered at Badfield, the

marquis of Salisbury's residence,

HAVANA PEOPLE WOULD RISE

Senator Gallinger Says That If War Should Come Nearly All Havana Would Rise Against Spain.

WOULD WELCOME A WAR

Many Who Are Ranked as Spanish Sympathizers Are at Heart Advocates of Cuban Independence.

Washington, March 18.—Senator Gallinger was at the capital today for the first time since his return from Cuba. When requested to make a statement of his observations, he responded: "You can sign my name to any picture you may draw of utter worthlessness, destruction and hellishness in that country. The condition of affairs, so far as I have had opportunity to observe, is simply indescribable. I had not expected to find it half as bad as it is, but the concentration of the rebels into all available points in the entire lengthing by the thousands for want of the communistic necessities of life. The best information I have had leads me to believe that the rebels, however, at a doubt, outnumber the destroyers by a ratio of ten to one, and the rebels are well equipped for a brutal polity, and the tragedy goes on from day to day. The society of the English is furnishng the rebels with arms, and the United States is willing to pay its burden not more than two-thirds of this sum for gun boats.

Colonel Hayley of Connecticut called at the navy and war department this morning in company with T. F. Rowden, whose introduction to the office of the chief of the naval bureau is due to his efforts, but the most of the people are beyond the reach of aid, whether military or medical, they lack even the element of shelter, bearing, whatever may be said of their merits as fighters. The rebels that I witnessed were a truculent crew, even more malignant than those that were undergoing their evolution; the soldiers were talking to each other and snarling as freely and unconcernedly as they could. They were not afraid of the English, nor did they consider them very formidable antagonists in the field of battle.

"Naturally there was much talk about the Maine disaster, and so far as I could determine, from my conversation with the Spanish consul, he is fully satisfied that the vessel will substantiate this view. There is a divergence of opinion on the island as to the proper course to be pursued by the Spanish government in the event of a war between Spain and the United States, and I am sure that those who are with me in this view are in a minority. I am told that the majority of the men I saw in the turn out are pro-Spanish, however, those that would worst Cuba from Spanish dominion. This is true, not only of those who are really favorable to war for independence, but of many of those who are ranked as Spanish sympathizers, who are at heart advocates of Cuban independence. The Spaniard's plan is to wait and see what the English will do. He is not yet ready to meet the English in the field of battle, but he is not yet ready to meet the English in the field of battle.

This is true, not only of those who are really favorable to war for independence, but of many of those who are ranked as Spanish sympathizers, who are at heart advocates of Cuban independence. The Spaniard's plan is to wait and see what the English will do. He is not yet ready to meet the English in the field of battle, but he is not yet ready to meet the English in the field of battle.

WEYLER DENIES IT.

Says He Did Not Write That Threatening letter.

Madrid, March 18.—Gen. Weyler denies the authenticity of the letter published in the New York Journal yesterday in which the former captain general of Cuba is alleged to have said that "there is no room for a Spanish army in Cuba." The letter is a copy of a communication from the Spanish minister of war to the Spanish ambassador to Madrid, in which he says that the Spanish government has received no new certificates of birth.

THEY PROFESS IGNORANCE.

Say We'll Letter to Guzman Was Never Written.

Havana, March 18.—Late last night a correspondent saw Don Francisco de Leon Sanz, the Spanish ambassador to Madrid, who is alleged to have written a letter, published in the New York Journal yesterday, apparently suggesting that the Spanish government should not have sent a warning to the United States to the effect that the Maine disaster was the result of Spanish treachery.

TOREDO DESTROYERS.

Attention of Naval Department Turned Toward Them.

Washington, March 18.—The president does not expect anything in the nature of a preliminary report from the court of inquiry on the Maine disaster to be received before the end of the month, but he expects that the inquiry will be completed in all respects, although following the usual course, it is within the power of the secretary of the navy to order the court to adjourn its investigation along certain lines should he desire further information desirable.

The navy department, however, has given a copy of the affidavit of the commanding officer of the Maine to the court of inquiry, and the court has been more surprised when asked if he had received such a letter.

"I have not received any such letter," said the chief of the naval bureau, adding that he had Havana in his memory, having "apparently" filled the work that Martinez Campos carelessly abandoned."

MONTGOMERY AT KEY WEST.

Movements of Some of the Public Vessels at That Point.

Key West, Fla., March 18.—The United States cruiser Montgomery arrived here this morning from Havana.

The United States cruiser Detroit sailed this morning for the Tortugas Islands, with provisions and ammunition for the fleet.

From the Tortugas the Detroit will proceed to Tampa to load some supplies, and then sail for Key West.

The Morgan liner Arkansas arrived here this morning from Havana with Senator Mooney and Congressman Amos Cummings and W. Alden Smith on board.

Another cruiser of the board which it is desired to put in force as soon as possible, the *Albion*, was reinforced by a number of torpedo boats.

These are vessels of about 300 tons displacement and able to travel the seas as well as the cruiser, with a speed of thirty knots per hour and an armament of quick-firing guns equal to the average gunboat.

According to the naval authorities, it is certain that the ideal naval craft is a distinguished naval officer, an expert in ordnance matters, experienced in politics owing to his acquaintance with Mayor McKenna and his administration, and a man who has recommended at the recent Republican convention. Last December Mr. Black, a member of Congress, proposed to Mrs. Sarah Layton Walker, daughter of Gen. [unclear], that she do easily, owing to their superior

NO SALE TO SPAIN.

Paris, March 18.—Captain Alcide, minister of war and navy says:

"You can emphatically deny the story

of the sale of the Chilean cruiser

Orizaba to Spain."

GLACIER BLOCKADE

Soft Snow on Valdes Glacier
Near Copper City Delays
2000 Argonauts.

WEATHER IS WARM

Twenty-Seven Miles of Snow
Covered Ice Block Way
to Copper River.

Seattle, Wash., March 18.—W. A. Conover, of Red Bank, N. J., who arrived here today on the steamer *Excelsior* from Copper river, says: Soft snow on the Valdes glacier is proving a stumbling block to the argonauts and there is a small blockade at Valdes and Copper City. There are about 2000 men there now and if colder weather does not come, the men will be stranded. It is twenty-seven miles across the glacier, and to March 12, but ten men had succeeded in getting through with their outfit. The trouble is due to the warm weather which keeps the snow very soft.

A great many have gone across the glacier without their outfit. John Hassack, a party headed by H. C. Elliott, a Negro, discovered a trail for getting across the glacier, and is going to try to find a new way to reach the interior. They have gone to Eureka below Oregon and expect to get across the interior by following up the stream.

John Hassack, who was taken sick at Valdes and returned on the *Excelsior*, says he was expected about a week ago in getting across the glacier. He said that while the snow was soft, many people would travel over it, but that a beaten track would be made. Hassack says that the greatest trouble on the glacier is the fuel question. There is not a stick of timber on the vast expanse of ice.

PURIFYING OF SKAGUAY.

Undesirable Element Is Being Forced to Make Exodus.

Seattle, Wash., March 18.—The steamer Queen arrived here last night from Skagway, Alaska, with fifty passengers. Among them were four from Dawson City, who left there about twenty-five days ago. They were H. L. Miller, James Rasmussen, J. McInloch and J. Pierce.

They brought no late news. Everything is reported quiet at Dyea and Skagway. At the latter place the exodus of the undesirable element continues.

EXODUS FROM DAWSON.

First Boats Will Be Crowded With the Miners.

Tacoma, Wash., March 18.—H. C. Pettit, of California, who returned from Alaska on the City of Seattle brings news to the effect that next June and July will witness a stampede from Dawson that will be equaled only by the present rush of gold-seekers to the Klondike. Up to Feb. 1 when Pettit left there were about 1000 miners. When that number was reached, the list of all miners was reached, the list of all miners was sold and no more applications could be received. When boats began to put the second loads there will be another rush. Practically every one of the 7500 are anxious to get out early and will bring gold, many in large amounts.

COOK'S INLET ACTIVITY.

Some Men There Are Getting \$70 for a Day's Work.

Seattle, Wash., March 18.—The latest arrival from Cook's Inlet, Alaska, is Charles Denham, the boy. He left Sunrise City Feb. 23. Denham reports a remarkable glacial gold field from the Kenai peninsula, 2000 feet above sea-level. He says the Cook's Inlet country is shooting up better than ever this winter, and the 125 men there are getting good returns for their work. Considerable mining has been done. Sixty miners are engaged in hauling provisions and sawing lumber for cabins and sluices. The coldest day of the winter was Feb. 21, the thermometer falling 42 degrees below zero.

SELLING THE REINDEER.

Seattle, Wash., March 18.—Levee Sheldan Jackson, acting on behalf of the war department, has sold 200 head of the reindeer herd that was purchased for the Yukon and its extension to private parties. It is understood that the government received about \$100 per head. The purchasers were P. C. Richardson, an Alaskan miner; Carrick and W. A. Brown, who is connected with an Alaskan transportation company.

ANOTHER RICH MAN.

Seattle, Wash., March 18.—According to Charles Benham, of Chicago, who arrived here on the steamer *Excelsior* last night, his brother, Capt. Mackay, which sailed from New York on March 12 for Liverpool via this port, arrived here at 3:30 o'clock this morning. On March 15 she steamed to known and unknown ports for six months, 500 knots, beating her previous records on both days. Her previous best record for a day's run eastward was 526 knots, but she has made 552 knots in a day's run going west.

LUCANIA'S QUICK RUNS.

Queensland, March 18.—The Comander Lucas, Capt. Mackay, which sailed from Liverpool on March 12 for Liverpool via this port, arrived here at 3:30 o'clock this morning. On March 15 she steamed to known and unknown ports for six months, 500 knots, beating her previous records on both days. Her previous best record for a day's run eastward was 526 knots, but she has made 552 knots in a day's run going west.

INCREDIBLE THIRTEEN WAGES.

Easton, Pa., March 18.—A general increase in wages of Lehigh Valley passenger trainmen has been made. Conductors who have been getting \$2.75 per day, have been getting \$3.00 per day, and brakemen to \$1.90 per day.

McDONALD WILL REFEREE.

San Francisco, March 18.—Peter Jackson and Jim Jeffries, who will meet in the ring next Tuesday, have agreed on Jim McDonald, the baseball umpire, as referee.

AUSTRIA AN ALLY

Spain is Courting an Alliance With the Realm of Francis Joseph.

AN AUSTRIAN GIFT

Consul Berndes at Havana
Donates to a Fund for Spanish Warship.

New York, March 18.—A dispatch to the Herald from Havana says: It is the evident intention of Gen. Blanco to make it appear that an alliance has been formed between Austria and Spain. With or without the sanction of the government, the Austrian consul, Frederick H. Berndes is lending himself to this idea.

Gen. Blanco has announced a banquet at the palace, at which the Austrian consul will be the guest of honor. Leading military and naval officials of the city will be present and altogether it will be an interesting affair.

An official within the palace is quoted as saying that the toasts at the dinner will be significant and their meaning cannot be misinterpreted, and that prompt disavowal of the affair by Austria is the only thing that Godsend Golden Medical Discovery, given to the world by Dr. V. Pierce, obtained. After six bottles had been used the pains and aches in my body are perfect; it invigorates the liver and purifies and enriches the blood. It is the great blood-purifying fluid-builder and restorer. In the best condition of nervous disorders and it cures 95 per cent, of all cases of consumption if taken in its earliest stages before the lungs are too far damaged. For chronic throat and nasal affections it is an unimpeded remedy. An honest dealer will not suggest some inferior substitute.

The great and unvarying success of Lydia E. Pinkham's Vegetable Compound in relieving every derangement of the female organs, demonstrates it to be the modern safeguard of woman's happiness and bodily strength. More than a million women have been benefited by it.

Every woman who needs advice about her health is invited to write to Mrs. Pinkham, at Lynn, Mass.

AN OPERATION AVOIDED.

Mrs. Rosa Gaum Writes to Mrs. Pinckham About It. She Says:

DEAR MRS. PINCKHAM:—I take pleasure in writing you a few lines to inform you of the good your Vegetable Compound has done me. I cannot thank you enough for what your medicine has done for me; it has indeed helped me wonderfully. For a long time I was troubled with ovarian tumors, each year growing worse, until at last I was compelled to consult with a physician.

He said nothing could be done for me but to go under an operation.

In speaking with a friend of mine about it, she recommended Lydia E. Pinkham's Vegetable Compound, saying she knew it would cure me. I then sent for your medicine, and after taking three bottles of it, the tumor disappeared! Oh! you do not know how much good your medicine has done for me. I am still taking it, and will continue to do so.

I am sending you a few lines to tell you what I have done with the No. 2 shaft.

GEORGE L. ROBBINS came to the Adirondack mountains and is making a success of the outdoor life.

The great and unvarying success of Lydia E. Pinkham's Vegetable Compound in relieving every derangement of the female organs, demonstrates it to be the modern safeguard of woman's happiness and bodily strength. More than a million women have been benefited by it.

Every woman who needs advice about her health is invited to write to Mrs. Pinkham, at Lynn, Mass.

THE DRY TORTUGAS.

Gen. Wilson to Report to the Government.

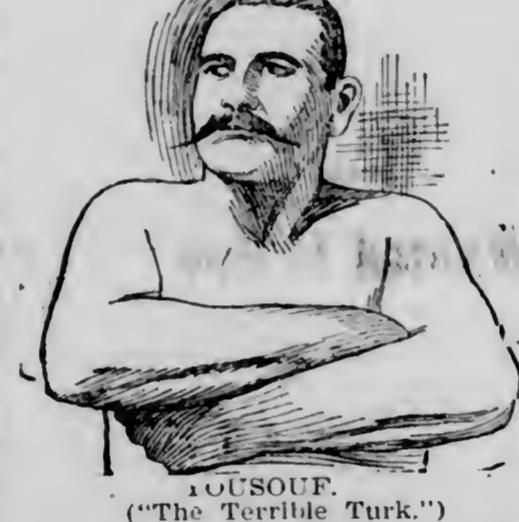

Washington, March 18.—Gen. William, chief of engineers, who has been in the South inspecting the forts and looking over our coast defenses, is expected to make a report to the government today or tomorrow. It is understood that his report will contain plans for the fortification of Tampa Bay, the first step in the construction of a fort to be built on the site of the old fort.

THE WORLD'S CHAMPIONSHIP.

Yousouf, the Turkish Wrestler, and Ernest Roebel Will Wrestle.

New York, March 18.—The managers of the two famous strong men and wrestlers, Yousouf and Roebel, have announced to meet tomorrow and make final arrangements for a wrestling match for the championship of the world on March 26.

Yousouf, or "the terrible Turk," as he is called, has conquered all the famous

strong men of Europe and the Orient. He has a grudge to anyone who tries to meet him and has placed \$300 on deposit as a forfeit should he back out. Ernest Roebel, the American champion, has agreed to meet him. He is to meet the Turk, has won many victories in this country. He says he feels confident of defeating the Turkish wrestler.

LAVIGNE AND DALY FIGHT.

Men Are Evenly Matched and a Draw Results.

Cleveland, March 18.—The 20-round fight between Kid Lavigne and Jack Daly for the lightweight championship of the world, at the Central Armory last night, resulted in a draw. The fight was very fast and exciting from the start. The contestants were so evenly matched that neither could gain an advantage over the other sufficient to get a decision in his favor.

The fight, which with the fight occurred, was crowded to its utmost capacity early in the evening before the preliminary contest began. Tickets could not be had after 10 o'clock, though \$15 and \$20 were offered. Seats were freely made. The spectators included sporting men from Philadelphia, Pittsburgh, Cincinnati, St. Louis, Boston and New York, and none of them were disappointed in the exhibition. "Kid" McGehee was the referee, and his decisions gave excellent satisfaction, notwithstanding the fact that the purchasers of tickets tried to influence the result.

JOHN MOSHK HANGED.

Minneapolis Murderer Executed in the Hennepin County Courthouse.

Minneapolis, March 18.—John Mosk, who shot and killed John Lemke at \$4 in an eatery of this city Oct. 21, 1897, was hanged in the court house of Hennepin county shortly after midnight. He gave the matter of his death no concern, and was indifferent to the execution.

Mosk was a moral degenerate, and an attempt has been made by his at-

tempt to give him insane. Two days ago he was computing the crime he was released from the state prison at Stillwater.

This trial and hanging is one of the swiftest cases of justice meted out to the guilty known in this country.

A head without a Gordon hat is like a man without a country.

MAP SHOWING THE LOCATION OF DRY TORTUGAS.

known as the masonry forts, which formed our only kind of sea coast defense.

The federal government in 1870 began to discard the solid forts of brick and stone for the more modern breastworks of earth and concrete, which have greater power of resisting the more powerful rifle of later days. But it was not until near the time of the Civil War that the fortifications became adjacent to the gulf of Mexico, about seven miles from Key West, the most southerly point of mainland Florida. One of these ten islands is Garden Isle, upon which Fort Jefferson was built under the direction of Gen. Totten, who instituted what was

then a new system of fortification.

Everything past the year 1870 has been making a rapid development, especially in increasing the capacity of the mines and increasing the number of men employed in the service of the navy.

It is anticipated that a hand-some dividend will be paid the present year and annually.

The new company, known as the Great Northern Mining Co., is to be organized in the fall of this year.

Subsequent to this, it is to be developed by the Chinese, who are to be given a third of the stock.

LARGEST CIRCULATION IN DULUTH.

OFFICIAL PAPER OF THE CITY OF DULUTH.

HERALD'S CIRCULATION**HIGH-WATER MARK,****17,148****THE WEATHER.**

United States Agricultural Department, Weather Bureau, Duluth, gives the following weather conditions for the twenty-four hours ending at 7 a.m. today, March 18.—Within a storm area which is centered in Northern Texas, and moves eastward, there will be rain at the stations of Omaha, Denver, El Paso, and McWayne, and snow at Lakewood, Denver, and St. Louis. The precipitation has been measured at McWayne, and is 1.25 inches. The last twenty-four hours have been clear.

The temperature has risen in the Southwest, and Missouri and Mississippi valleys, and the upper lake region. It is however, still cold, and other stations in the Northwest that includes the stations of Qu'Appelle, Regina, and Moose Jaw.

Temperature last night: Duluth, 34; Bismarck, 36; St. Paul, 35; Sioux City, 36; Omaha, 35; Denver, 34; Lakewood, 33; Chicago, 32; Milwaukee, 31; Minneapolis, 30; Duluth, below zero.

Duluth temperature at 7 a.m. today, 32; maximum yesterday, 42; minimum yesterday, 22.

Local Forecast for Duluth and vicinity: Partly cloudy with light rain or snow tonight and Saturday; cooler Saturday; winds shifting to northeast and becoming brisk tonight. JAMES KENEALY, Local Forecast Officer.

Chicago, March 18.—Forecast: 8 p.m., moonrise, 10 p.m. Rain this afternoon and tonight; Saturday rain or snow followed by clearing weather. For Monday, 8 p.m., moonrise, 10 p.m. Sun southwest portions tonight or Saturday; cooler tonight.

THE NEW HAWAIIAN PLAN.

There is still a possibility that the annexation of the Hawaiian Islands may be compromised at the present session of Congress. It has been made possible for the formal abandonment of the attempt to secure annexation by treaty. The treaty necessitated a two-thirds vote of the senate for ratification, and while there is a large majority in the Senate in favor of annexation, a two-thirds vote could not be secured. Consequently the foreign relations committee has fallen back on the frequently discussed plan of accomplishing annexation by joint congressional resolution, for which a precedent was established years ago in the case of Texas. The resolution requires only a majority vote in each house, and it is believed this will be obtained. Certainly the Senate will give a good-sized majority in favor of the resolution, and it is reasonably certain to pass the house, because it is an administration measure, and will therefore command the almost unanimous support of the Republicans while several Democrats are known to favor it. Of course its passage could be prevented at the present session if any of its opponents in the Senate indulged in filibustering tactics, but several of its most bitter opponents have said they would not filibuster. Speaker Reed is understood to oppose Hawaiian annexation, but it is not believed he will obstruct the taking of a vote on the resolution.

The resolution introduced by Senator Davis has been published by The Herald. With the resolution was submitted an extended report of the foreign relations committee. It states that the resolution brings the subject within the reach of the legislative power of congress under the precedent that was established in the annexation of Texas and continues:

"This important, clear and far-reaching precedent is a sufficient guide for the action of congress in the passage of the joint resolution herewith reported. If in the judgment of congress, such a measure is supported by a safe and wise policy or is based upon a national duty that we owe to the people of Hawaii in our interest, and there were found hundreds of patients. The symptoms in every case were the same. They all suffered from diseases growing out of starvation and exposure. I saw all those poor, suffering children in the orphanage and it was a terrible sight."

"Oh! mothers of the Northland, who tenderly clasp your little ones close to your loving hearts! Think of the black despair that filled each mother's heart as she felt her little ones drift away, and knew that she her little ones to perish know that she left her little ones to perish from the pains of starvation and disease. I have no words vivid enough to bring before you the poor, shrunken lips, the brown skin on some of them al-

most dead to some foreign power for help.

The report then reviews the history of the islands, and continues: "We owe it to these people that they should not again be brought into subjection to a monarchy that has lapsed because of its corruptions and its faithless regulation of solemn oaths. In this obligation our government is also deeply concerned for the maintenance and enjoyment of our treaty rights in Hawaii. To these people, and also to the preservation of the native population against a speedy destruction, involving property and life, we owe the duty of rescuing them from the silent but rapid invasion of the pagan races from Asia. The immigrants from Japan retain their allegiance to that empire, and yet they claim full political rights in Hawaii notwithstanding their allegiance. In this demand they have the unadmitted encouragement of the Japanese government. These privileges are demanded as rights. Such an invasion is clearly within the prohibition that the United States, in all our solemn declarations of war, have thrown around Hawaii to protect that people against all foreign invasion and interference with their domestic affairs."

The report discusses the attempts to restore the kingdom and says: "If Great Britain is not industriously and openly engaged in fomenting this concerted movement for the destruction of the republic and the restoring of the monarchy on its ruins, her agents and the princess—her protege—are kept conveniently near at hand to fasten her power upon the islands on the happening of any pretext for the protection of the lives and property of British subjects in Hawaii."

The report also speaks of France's interests and declares that all powers are anxious to acquire sovereignty over Hawaii. It asserts that the grounds of objection to annexation are very slight compared with the benefits to be derived. It might have added that the principal opposition in this country to the annexation of the island has been promoted by the sugar trust.

A MARKET IN CHINA.

The negotiations now going on between China and Great Britain as a result of the proposed Chinese loan have brought about the front our commercial interests in China. There are great possibilities connected with the future development of our trade with man and children and as subjects of the Spanish government they should have been protected by the Spanish officials from instead of being left to die from starvation and consumption disease. And yet there are some people in this country—fortunately a small minority—who uphold the policy of inaction on the part of our government and insist that it is not our business to put an end to the horrors of such inhuman and barbaric warfare.

The New York Sun says that one can easily see why England wish success to plans for the liberation of Cuba. Their losses through the devastation of the island are only less grievous than our own. Scores of cotton and tobacco estates are owned or mortgaged in England, and almost all the money invested in the insular railways came from London. It was with English capital that the public works were undertaken in a number of Cuban cities between 1878 and 1894. No interest or dividend will be forthcoming on any of these securities until peace has been restored in the island. In the event of war between the United States and Spain, these interests alone would prompt the British government to side with this country.

James Whitcomb Riley, the poet, says:

"I am continually haunted by the fear that my trunk will be lost, so I go about the country with a grip. In case there is a fearful railway accident and among the debris is a valise with an arm attached to it firmly, they may bury it without further identification, as the fragments of the Hoosier poet."

The insolent suggestion of the Spanish minister that our fleet should be withdrawn from Key West and war preparations should cease because it gives encouragement to the Cuban insurgents did not receive the vigorous reply which should have been given by this government. But what can be expected from a headless state department?

It is not likely, as the Transcript says, that any step will be taken by Great Britain to antagonize our interests in the scale, but it will be well to keep an eye upon both England and the middle kingdom for some time to come. But diplomacy can do little but supplement an aggressive action on the part of our manufacturers. The time is now ripe for such, and it is to be hoped that the work so well begun may go forward, until we shall have obtained our full share of the business of the country.

THE SUFFERING IN CUBA.

It is said that the death of Mrs. Thurston, wife of Senator Thurston of Nebraska, was due to the effect on a woman of the sufferings which she witnessed in Cuba. She accompanied her husband to that island and visited the hospitals and refuges where the Cubanans are huddled together in hopeless poverty. The miseries of skeleton-like women and children broke the heart of the noble American mother, a victim of her dying child. The scene greatly excited Mrs. Thurston's humane feelings and is thought to have hastened the end. A few days before her death, Mrs. Thurston wrote a letter to a New York paper, giving her impressions of conditions in Cuba. She said:

"Havana, March 11.—During the last year I have been a member of a society working under the instruction and leadership of Clara Barton. So naturally, my first impulse on reaching Havana was to seek her press and learn in her lips and see with my own eyes the work she has accomplished. When I went to pay a call on Miss Barton in the day, I found that she had a sort of dispensary attached to her private residence, and there were found hundreds of patients. The symptoms in every case were the same. They all suffered from diseases growing out of starvation and exposure. I saw all those poor, suffering children in the orphanage and it was a terrible sight."

The governor of Massachusetts, in a recent address, referred to the year 1990 as "the closing year of the nineteenth century." This should settle the much-disputed question.

If it had not been for the Quesada incident, the country might have forgotten that it has a vice president named Robert.

No one need be troubled about Spain and Austria forming an alliance. The Austrian navy is merely a fly-speck.

Turned a deaf ear.

Cathartic pills never have and never can cure indigestion and stomach trouble because they act entirely upon the body, not the bowels. The question naturally suggests itself: Who did this? The answer is simple: the manufacturer of the pills.

Stuart's Dyspepsia Tablets are vastly different in one particular from the ordinary proprietary medicines for dyspepsia. No secret is made of their ingredients, but analysis shows them to contain the following: Tartaric acid, Golden Seal, Bismuth, hydrosol, and muc. They are not cathartics, neither do they act directly upon the body, but rather on the digestion of the food.

This fear of being humbugged may be carried too far, too far, in fact, that many persons are inclined to think without a shadow of a doubt that there is only a risk a little time.

One of the latest remarks of the Kaiser concerns the German flag. The black, he says, represents work; the white, rest and peace, and the red, war, necessary to cement the other two together.

It is said that the India wheat crop is an abundant one, that the harvest is a month ahead of time, and that the export movement will be the largest in six years. This may prove troublesome to Mr. Lester in his effort to hold up the price of May wheat.

A big income is not a necessity in life. It is said a man can live there as a gentleman on \$300 a year. This sum will pay the rent of a house, the wages of two servants and supply plenty of food.

THE ORE
OUTPUT

Conservative Estimate Gives
Lake Superior District a
Total of 14,000,000.

HALF TO MINNESOTA

Vermilion and Mesaba Iron
Ranges to Ship Seven
Million Tons.

There will be shipped from the Lake Superior iron mines during the coming season not less than 10,000,000 tons of iron, of which fully one-half will come from the Minnesota ranges. This prediction is made by The Evening Herald after the most careful investigation and in estimating amounts obtained from a number of goliath interested in the several ranges. The shipments made by the Bessemer Ore association may be taken as a fair indication of what the Bessemer output will be on all of the old ranges, but the probable product in Mesaba and non-Bessemer ore of the other ranges will be indicated by the different ratios of mines or from the condition of the iron market which, in a measure, will indicate the demand that is likely to be met.

The larger companies are always reflecting the progress of their operations. At present the Duluth and the Vermilion iron ranges will be shut down during the winter, and the preparations made in the spring before the opening of the shipping season. In the meantime, in detail, the various caution has been to make them as high, but if they are in any particular it will be found when the last cargo has gone forward next fall that the total shipment will be even smaller than under what is here indicated.

In round numbers the output from the several ranges will be as follows:

Vermilion 4,000,000

Mesaba 5,000,000

Gogebic 2,500,000

Marquette 2,500,000

Minocqua 2,000,000

Total 14,000,000

In estimating the output of the Gogebic, Marquette and Minocqua ranges no effort is made to give the exact amount of production of the different mines. The Bessemer allotments for the Gogebic range amount to 2,500,000 tons. It is probable that small mines not included in the estimate will increase this by at least 100,000 tons, so that the estimate of 2,500,000 cannot be considered excessive. There are a large number of small grants in the Marquette and Minocqua ranges, so the Bessemer allotments do not indicate very accurately what the total output will be. Last season the Marquette

MAYOR TO DECIDE

Charter Commission Will Leave Appointment of Police Matron to Him.

THE PRINTING RATE

A Good Slice Knocked Off the Legal Rate—Other Matters.

Commissioners Gilmore, Patrick, Harrison, McDowell, Silberstein, Voss, Harrison, H. P. Smith and President D. F. Thompson, of the charter commission, met last night at the city hall. The action taken was the reconsideration of the resolution fixing the number of directors, it being finally decided to reduce the number to three members, a board containing a greater number being considered.

Commissioner Congdon being absent from the city, the president advised that the consideration of the limitation of power to tax to be held over, and that was agreed upon.

Then the much-voiced question of a police matron came up again, and with a heavy heart Mr. Voss, asked the commissioners to take some action to settle this matter, remarking that the ladies had been calling attention to some of late. In the first of his time he had been over during the two weeks to interview of men or less length and degree of head with the female portion of the community, and had begun to realize what that tired feeling was like. Mr. Green further said that he had been told that during this time he had been called upon to speak to the union cost the city \$17 for every woman arrested, and that as nearly all such arrests were made in the city, the cost was great. He did not appear to be any great loss for such an expense. After some discussion it was agreed to leave the appointment to the hands of the commissioners, the mayor and council.

Then the commissioners took the public printing in hand. First of all they agreed that it would be better to have the printer furnish the paper they would do the work at a "reasonable rate," but if otherwise, the way would be had a chance.

All papers must have been published for at least one year prior to getting any printing, and must be printed in the English language.

Mr. McDowell made a strong fight to make the rate of compensation the same as the present legal rate—55 cents per folio—but he was outvoted and his argument, that the commissioners had not been given the power to do this, was rejected.

the public printing in hand. First of all they agreed that it would be better to have the printer furnish the paper they would do the work at a "reasonable rate," but if otherwise, the way would be had a chance.

All papers must have been published for at least one year prior to getting any printing, and must be printed in the English language.

Mr. McDowell made a strong fight to make the rate of compensation the same as the present legal rate—55 cents per folio—but he was outvoted and his argument, that the commissioners had not been given the power to do this, was rejected.

Then the commissioners took

the public printing in hand. First of all they agreed that it would be better to have the printer furnish the paper they would do the work at a "reasonable rate," but if otherwise, the way would be had a chance.

AT WEST DULUTH

**Finnie Olson Heard From For
First Time at Havre
France.**

AROUND THE WORLD

**Will Not Return Until He Has
Made Circuit of the
Globe.**

About a year ago two West Duluth boys left their homes to see the world, one of them Bert Mallory, went with the knowledge and consent of his parents. The other, W. Finnie Olson, however, did not consult his father and mother concerning his enterprise of adventure, and they heard nothing from him until yesterday, when they received a letter dated Havre, France, in which the boy tells of his experiences and declares that before returning home he will make the world the school. His mother Olson, however, has permitted the school to publish some extracts from the letter. Among other things he writes:

"When I left home I intended to go round the world. I went to San Francisco. From there I shipped in the English ship Millburn under Mr. Patterson, who is now in the English Channel. On the third Tuesday in October. On Thanksgiving day we were off the Horn. There we were calmed for three weeks by heavy gales and then came into the South Pacific where we had rough weather. On Christmas and New Year's we were between 22 degrees and 15 degrees south, and then crossed the line on the Atlantic side Jan. 1st. Feb. 26, after some twenty-three weeks, when we reached Plymouth, England, for orders, and were towed from there to this port where we have been ever since. Today, March 1. We have been here two days and will be paid off today. Tonight I am going to Cardiff, England, in the car-boat. Misses Johnson may join me for Hong Kong, China. If so I will write to you from Cardiff and tell you. After buying my clothes I have about \$15 left, and that will take care of me."

The boy then speaks of some of his schoolmates in West Duluth and tells of his impressions in Havre, after which he continues:

"I suppose Bert Mallory has not come yet, for he did not intend to return before he went around the world. I lost him in Washington, where I went and worked. He said he was going to Duluth, and that he would write from

there, but I never found him after that. I am now with a young fellow named W. O. Pinkston from McBain, Mich. He and I are going to Hong Kong, China. I may be home in four years and may be not for three or four. You will not forget to write nor forget me. I have always been true to you, but don't let me know that I was going, but then I know that you would not let me go. I won't and I hope you will forgive me."

Bert Mallory, the boy mentioned by Finnie Olson, has written recently to his parents, still in Southern California. He has sent a number of very well written and entertaining letters to the West Duluth men, in which he describes his travels in the West. The Sun published a 3-column letter from him yesterday describing his experiences in Yuma, Ariz. Both of the youngsters are doing well, able to take care of themselves no matter in what part of the world they may be.

A CHILDREN'S SOCIAL.

The children's social to be given by the West Duluth Lodge, Degree of Honor, tonight will be participated in by a number of little girls from Proctor's. The dancing program will be rendered entirely by the children; Welcome address

Basket Ball Tonight.

The final game of basket ball of the season will be played at the Y. M. C. A. gymnasium tonight between the teams from the Y. M. C. A. and local schools and the local Y. M. C. A. Each team has won a series of equal length, so tonight's game will determine which is the better of the two. The winning teams of the two will be as follows:

SENIORS.

Duthie Superior.

Briggs forward Coye Holden.

Holden forward Chapman.

center Hall.

Brown guard Mumby.

JUNIORS.

Olson forward McDonald.

Barnes forward Lewis.

Strum guard Crawford.

Spurbeck guard Grace Conley.

Had Nothing to Say.

Otto Stalbush was arraigned before Judge Edison this morning on the charge of assaulting A. J. Katz. When asked to answer to the charge whether guilty or not guilty Otto, whose English is limited, thought it safer to stand pat than run the risk of giving an answer in English as much as an oyster. A plea of not guilty was entered, and the trial set for Tuesday, the accused being released on his own recognizance.

The address throughout was interesting and the bishop was listened to with attention and greatly enjoyed by all. Following his address was a "Salute to Erin" by the orchestra, being a selection of choice Irish music which was loudly applauded by the audience.

The address throughout was enjoyed by a number of young people. J. McElroy as the scheming old land agent was very good. E. F. Moore as the old fat and excitable Mrs. O'Donnell as her daughter caught the audience with her happy

and rollicking act.

"Shaun Aroun" was then given by a number of young people. J. McElroy as the scheming old land agent was very good. E. F. Moore as the old fat and excitable Mrs. O'Donnell as her daughter caught the audience with her happy

and rollicking act.

IRELAND'S GREAT DAY

Celebration in Honor of Its Great Saint at the Lyceum.

THE BISHOP SPEAKS

Address on Religion and Education in Ireland—"Shaun Aroun" Presented.

The St. Patrick's day entertainment given at the Lyceum last evening under the auspices of the cathedral chapter was a very successful affair in every particular. Long before the hour set for the opening of the entertainment the house was filled. The program was presented by the Plymouth orchestra. It was a selection of American national airs and was rendered in magnificent style, and at the close the outburst of applause from the audience well attested its appreciation.

The address of the evening was by Rev. James McGolrick. He said that Ireland had given the world a review of Irish history, in looking over the history of Ireland and the character of the people is asked what is the religious character of the people. In 422, which is a long ways back to look, St. Patrick landed as a missionary in Ireland having received the same from Pope Celestine. The people were always, then as they are now, predominantly a reverent people and thus became the people of the cross. They had received the faith of St. Patrick without the shedding of blood, but since that time they have been most severely persecuted by the government for their religious faith, and in preaching the faith of Christ to the people converted for sixty years. St. Patrick died on March 1, 463, and this is the occasion of the celebration every year. The faith established in Ireland is as fresh today as the day it was planted 1400 years ago, and although it was planted 1400 years ago and almost perished, it still exists, and the people have still held it. Then came a new order of things. In 1172 Henry II came over to Ireland, long after St. Patrick had died, and he and his army of people and then commenced a series of persecutions through which the people struggled. Next came Henry VIII, the King of England, who claimed himself head of the church and proceeded to change the order of things in the religious persuasion of the people of Ireland. He was a fierce, fanatical, uncompromising persecutor, and for 100 years spent in trying to convert the people, it is said, in getting sixty persons converted.

The traveler in Ireland sees at the first landing a church, and always the work of Cromwell in his task of conversion, so terrible was his work of destruction that if the Irish people had not been converted, he would have been put to death. He then referred to the literary merit of Ireland. For 700 years she was the teacher of the world and students of the world. Her missions then went forth along the Rhine, down the Tiber and to all parts of Europe. Their leaders and those who followed them were all Catholicks and to discharge all Catholicks in their employ, and to make them pay for it in force, they were all put to death. They were all put to death.

The people have right to their lands, but have been driven out of them, England claims to be the greatest nation in the world, and the Irish people are the greatest nation in the world.

Her missions then went forth along the Rhine, down the Tiber and to all parts of Europe. Their leaders and those who followed them were all Catholicks and to discharge all Catholicks in their employ, and to make them pay for it in force, they were all put to death. They were all put to death.

H. W. Hodges came up from St. Paul this morning and registered at the Spalding.

L. L. Bechtel, of St. Paul, is a guest at the St. Louis.

H. H. Flaherty, of Rat Portage, is registered at the St. Louis.

E. G. Clark, of Marquette, is among today's arrivals at the St. Louis.

Philip Carroll, of Hancock, Mich., is a late arrival at the St. Louis.

A. D. Page, of St. Paul, is in the city, a guest at the St. Louis.

KID MCCOY MARRIED.

But There Is a Secret and Sensation About the Affair.

Cleveland, March 18.—It is learned that Kid McCoy, who came to Cleveland to referee the Lavigne-Daly fight last night, was recently married at St. Louis on March 6, the day following the granting of the decree of divorce to the pugilist's first wife. Details of the marriage were not given, but it is extremely narrow. It is known only that the bride is a New York girl and that she is very sensational in her ways.

When asked by a reporter about his marriage, McCoy became extremely nervous and said: "That's none of your business. It's a matter that concerns myself only."

"Doc" Payne, the Kid's trainer, was soon laid low and asked the reporter if McCoy had uttered a word about his first wife and the divorce mixed up in the matter. You know he was married the day after the decision was given, so you can understand that I cannot talk on account of his sensitiveness. In fact, if you but knew all the details, you would not care to ask me anything about it and I know you would not have the heart to question the Kid."

CANADIAN BLUE LAWS. Ottawa, March 18.—The bill prohibiting the distribution or sale in Canada of liquor for purposes of purporting to be issued on Sunday passed the second reading in the Dominion house of commons last night.

STARS AND STRIPES

Now Float Over the Cruiser Amazonas, Built for the Brazilians.

THE TRANSFER MADE

Vessel Handed Over With the Expressed Sincere Friendship of Brazil.

Gravesend, Eng., March 18.—The cruiser Amazonas, built by the Armstrongs for Brazil, and purchased by the United States, was formally transferred from the Brazilian flag to the stars and stripes shortly after 11 o'clock this morning. The ceremony was simple and dignified, and to the Brazilian officers it was somewhat pathetic.

Lieut. Commander Colwell, United States naval attaché, accompanied by Ensign Roberts and Assistant Engineer McMorris and Consul General Osborne, arrived on board shortly before 11 a.m. The American flag, the national and number of custom officers, all in uniform, were already on board. Lieut. Commander Colwell and his party were received at the gangway by Lieut. Commander Corres, in the captain's cabin, where they were received by Commander Corres. In reply to Lieut. Commander Colwell's query, "What vessel are you ready to transfer?" Corres replied, "The vessel is ready to be transferred to me in the United States."

Lieut. Commander Colwell, accompanied by Ensign Roberts and Assistant Engineer McMorris, donned their uniforms and proceeding to deck, gathered near the flag staff, from which the green flag of Brazil was

being lowered. On the American flag, the stars and stripes, was the inscription "U.S. Navy."

Lieut. Commander Colwell then received the Brazilian flag from the captain, and the two nations exchanged a salute.

Lieut. Commander Colwell then faced the Brazilian flag flying from the stern, and the officers bowed to the heads of the flag of Brazil while it was hauled down at 11:10 a.m., after which, facing about, with their heads covered, "Old Glory" was run up the main mast.

Lieut. Commander Colwell and the Brazilian officers thereupon shook hands. Commanders Corres and Colwell then led them all into the cabin to drink to the health of the American and Brazilian officers.

The Amazonas will remain under the charge of Ensign Roberts until the United States gunboat San Francisco arrives here.

Great interest was taken in the dynamite, which is said to be unique in naval history by which one power was consumed in the discussion of the Cuban situation and it can be stated on good authority that no one else in the world has ever heard of such a quantity of dynamite placed in the harbor in different places, two tons, connected with the Calabas fortress, and the Capitanio Puerto, or marine headquarters.

"I had noticed for several nights mysterious packages being carried along in the fortress. On inquiring from a soldier whom I knew what it was he informed me that they were carrying from the magazine of the fortress large quantities of dynamite, which was being held in the harbor."

"My investigations during my period of imprisonment were carried as far as a political prisoner could go to Spain to ascertain the quantity of dynamite placed in the fortresses. On inquiry from the engineer of Fort Sloane he told me that the magazine of the fort contained 100 tons of dynamite."

"I had been told that the magazine of the fort contained 100 tons of dynamite."

"Lieut. Col. Anneau, King's engineer, who was in command of the fort, was asked to give me the quantity of dynamite placed in the fortresses, but he could not tell me exactly how much there might be, as he was not allowed to enter the fortresses."

"Lieut. Col. Anneau, King's engineer, who was in command of the fort, was asked to give me the quantity of dynamite placed in the fortresses, but he could not tell me exactly how much there might be, as he was not allowed to enter the fortresses."

Granted New Trials.

On more Christ Baum has the men in jail for trial for the third time. On the second time he was granted a new trial which may possibly never be held. Yesterday afternoon James and George Sherrill, representing Baum, filed a motion for stay of trial, applying to Judge Eisinger for a new trial on the ground that the verdict had not been reached after a long and laborious trial. Judge Eisinger granted the motion. The men were remanded to county jail but were afterward released on their own recognizance without bail, their bonds remaining until next term. If no new evidence against them turns up, it is probable that no

trial will be held, according to the county attorney.

PREPARED TO FIGHT

James Corrigan Will Join in Complaint Against Ore Freight Rate.

IS IN DULUTH TODAY

Complaint May Be Entered With Railroad Commission Within a Week.

James Corrigan and Franklin Rockefeller, of Cleveland, the former the principal owner of the Commodore mine on the Mesabi range, and the latter of the Franklin on the Mesabi and Zephry on the Vermilion, arrived in the city this morning and registered at the Spalding. Mr. Corrigan is very much interested in the movement to force a reduction of ore freight rates and promises to fight rather than let the miners get the right rate. He is not, however, in a position to do so, as he and his partners have no control over the mines on the Mesabi range. They have made it absolutely impossible for anybody but themselves to mine ore at the mines on the Mesabi range. The cost of production has gone up, and the rail freight rates are up, so there is no way to work the Commodore mine, but that their property was worthless.

To a Herald reporter Mr. Corrigan said today that he and two partners had no control over any of the mines on the Mesabi range, and that they could not consider the ownership of the range interests.

The Herald reported Mr. Corrigan that the miners advanced the price of ore this year because wages have advanced and advanced prices on old wages. This is the reason, however, for I find that they are again advancing on the prices which enter into the cost of production. These we have to pay 50 cents a ton freight rate. It is evident the individuals owners of the mines on the Mesabi range. They have made it absolutely impossible for anybody but themselves to mine ore at the mines on the Mesabi range. The cost of production has gone up, and the rail freight rates are up, so there is no way to work the Commodore mine, but that their property was worthless.

The Herald reporter asked him if he was going to sue the railroad companies. "That is, we are to sue the minimum wage for the house, but every ton will be produced at an absolute loss."

"I have read the article in The Herald and the one in the Tribune," he said, "and have seen the signs being taken by mine owners to obtain relief. I am willing to co-operate with them in presenting our complaint before the state board of railroad and warehouse commissioners."

Mr. Corrigan will not visit the range in the present case. He will go to West Superior tomorrow afternoon to attend a meeting of a Wisconsin mining corporation in which he is interested.

When asked if Franklin Rockefeller would participate in the movement to reduce the rates, Mr. Corrigan said he had not heard of him on the subject, but that he would not ask him to do so because of his relations with the owners of the Duluth mines.

Mr. Rockefeller will, it is found, reluctantly operate the Franklin mine this season. His opinion in regard to the freight rates is not known. He expressed himself very freely on the question to an Evening Herald reporter last summer, and has been asked to repeat the statement that would warrant a change of mind. The Herald reporter was unable to get an expression from him on the subject today.

In the coming week The Herald informed that steps have been taken to complain with the state board of railroad commissioners within a week.

Those who have assumed the burden of the battle have equipped themselves thoroughly and are confident that success is assured.

Has Different Opinion.

Dr. Brimhall, of the state board of health, who has been here investigating the alleged cases of malignant and other diseases among miners and citizens of the city, says that he is inclined to think that the disease is not anthrax, but that it is a malignant and contagious disease of the nature of anthrax that developed two years ago. Dr. Brimhall will make his report in a few days.

Found the Picture.

A search warrant for the premises at No. 1 West Street was issued this morning by Judge Edson on complaint of L. M. Pelton, who alleged that a portrait belonging to his widow, Mrs. Pelton, was concealed there. Court Officer Jensen made a search and discovered the picture on the premises.

SHERWIN RESIGNS.

Judge Morris is Troubled About
Appointing a New Marine
Hospital Surgeon.

Washington, March 19.—(Special to The Herald)—Congressman Morris is having considerable trouble over the selection of a successor to Dr. Sherwin, surgeon in charge of the treatment of patients under the Marine hospital service at Duluth.

Under the present regulations these patients are cast for by contract, either at St. Luke's or St. Mary's hospital. The question which has caused the most trouble is whether the surgeon will be appointed on that point. Departmental precedent is against it, and to decide the case according to these proceedings would be dangerous. Inasmuch as a large number of titles were predicated on the story of the wreck.

Mr. Brynes and Senator Davis will make arguments on the legal propositions in the case on Tuesday.

THE STATE'S CLAIM.

Tim Brynes Argued for School
Lands in the Red Lake
Reservation.

Washington, March 19.—(Special to The Herald)—T. E. Brynes, of Minneapolis, representing the state of Minnesota, today made an informal argument before Assistant Attorney General Van Duyven, of the interior department, on the state's claim for the school lands in the Red Lake reservation.

The question was whether or not the state had the right to have its claim reserved even as between these naval officers and the Indians.

The purpose of the conference, he said, was to get the state to withdraw from the negotiations with the Indians.

Dr. Sherwin has resigned and there are several candidates for the place, most prominent being Drs. Robinson and Magie.

ACTOR WILLARD NEEDS REST.

Has Closed His American Season and
Will Go to England.England's Aged Statesmen Is Under-
going Severe Suffering.

London, March 19.—The Pall Mall Gazette this evening says Mr. Gladstone's general condition is apparently worse. It adds: "It was his own wish to be removed to Liverpool, where he has been staying for past two months, and there is a average of about sixty cases annually."

Dr. Sherwin has resigned and there are several candidates for the place, most prominent being Drs. Robinson and Magie.

Board's Report.

EXPECTED IN A FEW DAYS

Four Survivors of the Maine Called on the
President and Related the Story
of the Wreck.

Washington, March 19.—The keenest expectancy was apparent in all official quarters today in anticipation of the early receipt of the report from the court of inquiry on the Maine disaster. Warlike preparations continued with unabated vigor at the war and navy departments, but the main interest of officials centered in the forthcoming report. The interest was so intense that many reporters gained circulation to the effect that the official documents would be in the hands of the president within the next twenty-four hours, but their conjectures on inquiry from authoritative sources were found to be inaccurate.

Persons in a position to know had little to add to the fact already known that the report was expected within the next few days. A cabinet officer stated that it would be here early next week. The president did not know what state of mind the court of inquiry would be in as to the character of the report he had received here. One report had it that Lieut. Long had brought to Washington an abstract of the conclusions, but this was dismissed after Lieut. Blow had been re-elected and fresh proposals were rejected promptly.

Secretary Long, in a position to know, had nothing to add to the fact already known that the report was expected within the next few days. A cabinet officer stated that it would be here early next week. The president did not know what state of mind the court of inquiry would be in as to the character of the report he had received here. One report had it that Lieut. Long had brought to Washington an abstract of the conclusions, but this was dismissed after Lieut. Blow had been re-elected and fresh proposals were rejected promptly.

One report had it that Lieut. Long had brought to Washington an abstract of the conclusions, but this was dismissed after Lieut. Blow had been re-elected and fresh proposals were rejected promptly.

The chief development of the morning was the arrival in town of the survivors of the Maine, who had had a long conference with Secretary Long, and later were taken by the secretary to the White House for a talk with the president. The survivors included Lieut. G. E. W. Holm, navigator of the Maine; Lieut. Geo. P. Blome, Lieut. A. C. Carl, and Lieut. J. H. Boutwell Larkin, one of the non-commissioned officers of the Maine. They had been captured by the Spaniards and had been held in confinement ever since the sinking of the ill-fated ship. The diverse band of survivors differed in their accounts of their capture from Capt. Sigler, command in Havana and their coming to the United States.

When they came to the United States, they were sent by Secretary Long to the office of the naval constructor, who had been given the task of fitting up the Maine. They had been captured by the Spaniards and had been held in confinement ever since the sinking of the ill-fated ship. The diverse band of survivors differed in their accounts of their capture from Capt. Sigler, command in Havana and their coming to the United States.

In Duluth's Social Circles

Society has three weeks more of Lent and if they do as quiet as the present one has been, the social season will be ready for a long session afterward. There was little or nothing this week. The weather has been too warm for winter outdoor parties and visions of summer picnics and boating parties had already begun to appear, but were rudely dashed to earth by today's snow. The Assembly promises a party right after Easter and that announcement will interest all the young people.

An event of much interest in Duluth social circles is the marriage of Miss Florence Silberstein, of this city, to Jacob M. Gidding, of Minneapolis, Pa., which will take place next Wednesday evening at the home of the parents, 31 West Second street. Mr. Gidding arrived in the city last Wednesday. The wedding will be strictly "private," but the members of the relatives will be present. The ceremony will be performed by Dr. Sigmund Frey of Temple Emanuel. Immediately after the wedding the happy couple will leave on an extended westward tour, during which they will visit New York city, Washington, Norfolk, Old Point Comfort, and other cities. They will be at home to their friends after April 20 at Minneapolis.

Monday afternoon at Minneapolis Miss Minnie Vial, daughter of Mrs. Miner Vial, and St. John J. Jones of Duluth, will be married at the home of the bride's uncle, James Evertson, of 401 Second street. The wedding will be a very quiet one. Miss Vial has made her home in Duluth for three or four years and is a charming young woman who has never had a musical education. Mrs. Jones has been associated with A. D. Thomsen for years and is his floor man on the board of trade. After the wedding the bride and groom will leave at once for Montreal to be present at the marriage of Miss Esther Jones, sister of Mr. Jones, to Leo Dugay, of Plion, of McGill university, which takes place Wednesday. From there they will return to Duluth and be at home after May 15 at 125 East Second street. No card was issued.

Mr. and Mrs. L. R. Bondy entertained last evening at Miss Florence Silberstein and J. M. Gidding's residence were Mr. and Mrs. J. Silberstein and children, Mrs. A. Bondy, Miss Fannie Weiss, and R. Marcus.

The Q. C. U. is meeting this afternoon with Miss Bradley, of 1125 East Superior street.

Mrs. Charles L. Louis will give a dinner party next Tuesday evening at her home in Chester terrace.

Mr. and Mrs. Louis S. Koch will give a dinner party next Tuesday evening at Miss Florence Silberstein and J. M. Gidding.

The program for the meeting of the Chautauqua circle on Monday is as follows:

Bell—all—"Quotations on Frederick the Great";

Lesson—"Roman Life in Pliny's Time"; chapter—Selected Poems;

Led by Mr. K. Burns;

Lesson—"Medieval Europe"; chapter 12;

Led by E. L. Oliver;

Biographical sketch—Frederick the Great;

Miss Clara Humason.

Mr. and Mrs. H. Miller will give a dinner party this evening at their home in the Ashtabula terrace in honor of Miss Florence Silberstein and J. M. Gidding.

NEW POINT IS RAISED

Damage Suit of Man Hurt While Walking on Street Car Track.

COMPANY'S DEFENSE

Claims He Had No Right There --Car Running Contrary to Custom.

The personal injury case of Erik Johnson against the Duluth Street Railway company, which was continued yesterday afternoon until Monday, is resting on a new and somewhat interesting issue. Yesterday afternoon defendant, at the close of the plaintiff's testimony, moved to dismiss the cause on the ground that it had not been shown that the company was negligent, and on the further ground that the plaintiff had contributed to his accident by his own negligence in walking on the tracks. This raised the question that he had.

Albany deserved, for the plaintiff, claimed that the streets were full of snow at the time of the accident, and that the tracks, so that it was necessary for pedestrians to walk on the tracks, and that it had been the custom to use the tracks instead of the sidewalks at that time all winter. He also claimed that it was the custom for the company to run westbound cars on the northern track and vice versa. This he asserted, so that when he was walking on the southern track no car could strike him, because it would have to come from the north where he was not. In raising this in contrary to custom he claimed the company was negligent, and he claimed that the plaintiff did not have contributory negligence, because he had good reason to believe that no car would come from this direction.

The argument has not quite finished yet, but defendant, according to Judge Dowd, said that he did not care to hear argument from the plaintiff's attorney on any question except the one mentioned.

LIVE PIGEON SHOOTING.

Crack Shots of the Country to Compete Next Week.

New York, March 19.—The tournament of the live estate association, under the auspices of the Grand American handbill live pigeon shooting which is contested annually, will begin at the grounds at Elkwood Park, N. J., on Thursday next. The opening dip up will take off at 2 p.m., and the handbill event, because it was not possible to get the start, will be held on Saturday morning.

The Grand American will begin on Wednesday, but the handbill event, because it was not possible to get the start, will be held on Saturday morning.

The results may not be known until Friday.

The handbill is donated a handsome silver cup to be presented to the winner. In addition to the first money prize, there will be a \$100.00 purse for the former winners. T. A. Marshall, Keweenaw, Ill.; O. B. Dickey, Boston; J. W. Hart, Toledo; Phillips, J. C. Murphy, Patterson, N. J. Every other member of note in the country is mentioned in the entry list.

INTERNATIONAL CHESS.

Great Britain Is Ahead of America Several Points.

New York, March 19.—Play in the cable chess match was resumed today in the presence of a large number of experts assembled in the Academy of Music. Ned Young, of Boston, resigned his game to Alexander Kotov, of Russia, and the match stood at 1½ to 1½.

The match will begin again on Wednesday, but the handbill event, because it was not possible to get the start, will be held on Saturday morning.

The results may not be known until Friday.

The handbill is donated a handsome silver cup to be presented to the winner. In addition to the first money prize, there will be a \$100.00 purse for the former winners. T. A. Marshall, Keweenaw, Ill.; O. B. Dickey, Boston; J. W. Hart, Toledo; Phillips, J. C. Murphy, Patterson, N. J. Every other member of note in the country is mentioned in the entry list.

ANOTHER GERMAN DISCOVERY.

American Meat Said to Be Affected With Trichina.

Berlin, March 19.—Officials of the Brunswick government report that they have discovered trichina in several lots of American meat. The government of Brunswick has asked the bnderath to issue a decree prohibiting the importation of American meat.

COLLEGE BOY ORATORS.

Platteville, Wis., March 19.—Ranahan, of Whitewater, carried off the crown in the international oratorical contest which was held in this city last night. Charles Cooke, of Platteville, and C. J. Lunak, of Oshkosh, were tied for second place. This entailed a tie-breaker, and the contestants remained long at the interstate contest at Normal, Ill. Ranahan's speech was "The Puritan and Puritanism." Stevens Point, Milwaukee, and Platteville were represented. The next contest will be held at Stevens Point.

STUDIES BY A THAIN.

St. Louis, March 19.—A special from Danville, Ky., says: While from you I have received a telegram in which you say that your son, John, who was born in Danville, is in a hospital in New York, suffering from appendicitis. The doctor says he will be well soon. The others are recovering.

AIRMAIL POPPOFF POPS OFF.

St. Petersburg, March 19.—Admiral Popoff, aide-de-camp of the czar, is dead.

You may never know it happened if you are not a subscriber for The Evening Herald.

SCHULTZ TESTIMONIAL CONCERT.

First Presbyterian Church, Wednesday Eveng., March 23. Tickets, 50 and 75 cents.

CITY BRIEFS.

Column, dentist, Palatado. Phone No. 9. Smoke Endian cigar; W. A. Poote. The company laundry is boycotted. Send your work there.

The committee, having charge of the bazaar, will hold a meeting Thursday at the Electrical Workers' hall to make up its report of the bazaar for submission to the Trades' assembly next Friday evening.

The Interurban Medical Association held a meeting at the Western Superior hotel last night, and a paper was read with a bulletin, after which several papers were read by Superior medicals. There were sixty-six present. The paper was reported by Dr. Braden, Grover, Sherwin, Collins and Titcomb.

A memorial service in honor of Miss Willard will be held Sunday morning at 10 a.m. at the Norwegian Danish M. E. church, under the auspices of the Scandinavian Temperance committee of Duluth. Mrs. Ostergren is in speak on the life of Miss Frances Willard. Other speakers will be John T. Dow and Rev. F. Linden. The church chow will sing.

E. C. Grindstaff, who became ill for some time, was considerably worse yesterday, and the members of his family were greatly alarmed, but he is somewhat better today.

Michael J. Marshall, an 11-year-old boy, who is too much for his whole family, was arrested this morning on the charge of incorrigibility, committed by his father, Andrew Marshall. His trial will be by Judge Edson for this afternoon.

Menzo Caldwell and Miss Alice Johnson, of Grand Rapids, were married last evening at the Seventeenth Avenue post, by Rev. J. W. Longridge. After spending a few days with friends in Duluth and Minneapolis they will leave for Dakota, where they expect to remain for several weeks.

Phillips & Co., the shoe dealers, have decided to discontinue their shoes, and are giving a reception tonight, as a parting gift to the leading educational institution. He will resume his duties as pastor of the Swedish Lutheran church at once.

Kelly cocaine clothes clean.

The naval reserve will meet this evening at Collector Willett's office in the federal building. Officers will probably be elected.

The games between the Duluth and Superior Whig clubs will take place next Thursday evening at the rooms of the Superior club.

A portion of the incorporation of Bethesda, Norwegian Lutheran church, which was organized in 1892, was filed this morning in the office of the registrar.

WRITERS FROM SEATTLE.

W. B. Getchell, in a letter to a friend in West, writes:

"I am in Seattle, visiting my son, Mr. Quinton, who is a student at the University of Washington.

He is a tall, slender, dark-haired boy,

and is a credit to his parents.

He is a good student, and is doing well.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

He is a good boy, and I am very proud of him.

Across the Tea Table

March, with its ever changing aspect, keeps one constantly alert to meet the demands of heat and cold, storm and sunshine, so that life and times are a bit uncertain, like the seas on these days. But one lives in the delights of anticipation. In watching the color grow in the grass, the buds swell upon the trees, and the growth of the house plants, which are now showing the care bestowed upon them during the winter. These are a great delight now, and almost every housewife has her array of blooming plants to display with pride, or her roses, begonias, pansies, etc., while she is making every effort toward the patience and care shown them and which are welcome to the eye while seated in the sunroom in the hours of leisure. The passers-by are showing a bit of fuzz, and their dewy, darling, true harbingers of spring, sent to us to make us forget the winter. They bring into the house and placed in a jar of fresh water they will be a pleasure reminder and comfort. The Woman's club started the fund for the building of dormitories for women at the college. The Woman's club raised the money for Glenwood, and now the industrial school, for homeless boys it sees that compulsory education is carried on, and provides clothing for crippled children. It is a woman in Munition Roads, however, who sits upon clean streets; and a woman at the head of it, the effort is being made to clean these Aegean scabs.

Behind every reform you can catch a glimpse of some enterprising whisker-monger engaged in his trade. The Women's club is the first to establish this. The hideous condition of mentally x patients during an epidemic brought this to the notice of women. A club was formed, and a new organization by giving the first one. The president of the club presented bath houses for the poor in some of the most notorious districts. The Woman's club started the fund for the building of dormitories for women at the college. The Woman's club raised the money for Glenwood, and now the industrial school, for homeless boys it sees that compulsory education is carried on, and provides clothing for crippled children. It is a woman in Munition Roads, however, who sits upon clean streets; and a woman at the head of it, the effort is being made to clean these Aegean scabs.

HIS ROLL DISAPPEARED.
Nelson Bauschens Receives an Object Lesson on Temperance.

Nelson Bauschens and E. Johnson reported at police headquarters this morning that the first named had been snatched from sight of men and drifts last evening \$300. The loss was first discovered when they were in Mitchell's restaurant about 8 o'clock in the evening. Bauschens was leaning on a bank, when taken away, they were told, but neither of them could say any facts to substantiate that belief.

The two arrived in the city yesterday in the South Shore train en route to Duluth. While waiting about the station, one who had at one time worked at Bauschens' camp, a man known as Billie, and all four visited several saloons or liquid refreshments, the only one of them being the "White Front" saloon. When they arrived at Mitchell's restaurant, Bauschens was unable to keep his balance and fell into a stool. It is thought that he may have dropped his pocketbook on the floor at this time and that it was picked up by another, who was unable to give the names of their friends from the place they left at what time last night they left the city. Of the sum lost, \$100 was in drafts and payment on a bill was stopped this morning by tele-

JUDGMENT ENTERED

Attorney W. C. Parker Must Give Mrs. Olive Bradley Gray Her Property.

DEEDED TO HIS WIFE

Mrs. Gray Accused Him of Trying to Make Way With It.

The litigation between Olive Bradley Gray, the common law widow of the late Rich A. Gray and one of the contestants in the suit in probate court over his estate, and William C. Parker, of Chicago, her attorney, was ended yesterday by the entry of judgment against Parker. After the Gray case was settled by distributing the assets among all of the claimants, plaintiff in this case filed a complaint in which she alleged that Parker, who was her attorney in the fight over the estate, had without her authority transferred all of her interest in the estate to his wife. She claimed that she had given him a power of attorney that empowered him to dispose of her interest in the estate, and that he had represented her in her interests and informed her that he was trying to make use of his assistance. After he was handcuffed, Kelley continued to fight and took three officers to get him into the courtroom. He was then asked if he may be taken to make an example of the men who refused to assist Troyer when he called on them.

SOUTHERN MINING.
W. J. Olcott Tells How It Is Conducted There--Employees Get Nothing.

W. and Mrs. W. J. Olcott returned yesterday from a trip through the East and South, having been gone five days during which time they visited New York and Washington, spent evenings in Chattanooga, Tenn., and Birmingham, Ala., the iron mining and manufacturing center of the South, and enjoyed the climate and society of both.

A Herald reporter, who caught up with Mr. Olcott and his wife at their hotel in Atlanta, learned that the husband had sold himself entirely to pleasure and sight-seeing and had not kept in touch with business matters connected with the company. He also knew of the conduct of his son-in-law, and did not know what was being done for the company's capital.

The case was to have come to trial at the end of a month, but yesterday afternoon an application was filed by which Parker agreed that judgment should be entered against him if it was without costs to him. Judgment was therefore entered in his favor, that the transfer from the plaintiff, through Parker as her attorney, to Mercy C. Parker, his wife, should be declared void. His son-in-law, Francis Jackson, who represented the Gray estate in probate court and who was therefore opposed to the plaintiff in that suit, went to the attorney's office to make an example of the men who refused to assist Troyer when he called on them.

TAX SUITS ANSWERED.

Several Replies Filed Today In Proceeding for Enforcement.

A number of answers to the proceedings for the enforcement of real estate taxes for 1896, 1895 and prior years are coming to the clerk's office, the most recent suit that there was a question in which had two sides and that after the case was one presented each would have an opportunity to be heard. He has received instead of a written answer a copy of the Gray estate in probate court and who was therefore opposed to the plaintiff in that suit, went to the attorney's office to make an example of the men who refused to assist Troyer when he called on them.

Chief Black May Stay Here in Spite of St. Paul's Offer.

It is stated that Chief Black may be retained here, in spite of the offer of \$3000 which, it is said, St. Paul will make. It is known that the chief prefers to remain in Duluth at the same time even though lower pay than St. Paul may offer. It is stated, too, that the chief has said that he would not hesitate a minute in declining in favor of Duluth at \$3000, while the compensation is somewhat less than the faultless deposition in dealing with the department. It is stated, further, that steps may be taken by a number of the leading business men to induce the difference between the chief's salary here and that of St. Paul will be doubled.

If Chief Black should go to St. Paul, he might possibly not hold the position very long at that figure. If the new charter now being drawn in St. Paul should be adopted, the salary of the chief of the fire department will be raised to \$3000, it is expected that he will be a double tax.

Chief Black objects to having some part of his in section 6-9-14 assessed at \$15,000, when he claims it is only worth \$1500. He also objects to assessments amounting to \$10,47, which he believes are not correct. He has not been able to find any sales had been made for the past year, and that the figures that rules has been for understanding that it was expected that advances should not be made.

He objects to the movement that is on to secure a reduction of one freight rate through the state board of railroad and waterway commissioners, and does not think that there was a question in which had two sides and that after the case was one presented each would have an opportunity to be heard. He has received instead of a written answer a copy of the Gray estate in probate court and who was therefore opposed to the plaintiff in that suit, went to the attorney's office to make an example of the men who refused to assist Troyer when he called on them.

WILSON TELLS HOW IT IS CONDUCTED THERE--EMPLOYEES GET NOTHING.

W. and Mrs. W. J. Olcott returned yesterday from a trip through the East and South, having been gone five days during which time they visited New York and Washington, spent evenings in Chattanooga, Tenn., and Birmingham, Ala., the iron mining and manufacturing center of the South, and enjoyed the climate and society of both.

He also objects to assessments amounting to \$10,47, which he believes are not correct. He has not been able to find any sales had been made for the past year, and that the figures that rules has been for understanding that it was expected that advances should not be made.

He objects to the movement that is on to secure a reduction of one freight rate through the state board of railroad and waterway commissioners, and does not think that there was a question in which had two sides and that after the case was one presented each would have an opportunity to be heard. He has received instead of a written answer a copy of the Gray estate in probate court and who was therefore opposed to the plaintiff in that suit, went to the attorney's office to make an example of the men who refused to assist Troyer when he called on them.

WILSON TELLS HOW IT IS CONDUCTED THERE--EMPLOYEES GET NOTHING.

W. and Mrs. W. J. Olcott returned yesterday from a trip through the East and South, having been gone five days during which time they visited New York and Washington, spent evenings in Chattanooga, Tenn., and Birmingham, Ala., the iron mining and manufacturing center of the South, and enjoyed the climate and society of both.

The case was to have come to trial at the end of a month, but yesterday afternoon an application was filed by which Parker agreed that judgment should be entered against him if it was without costs to him. Judgment was therefore entered in his favor, that the transfer from the plaintiff, through Parker as her attorney, to Mercy C. Parker, his wife, should be declared void. His son-in-law, Francis Jackson, who represented the Gray estate in probate court and who was therefore opposed to the plaintiff in that suit, went to the attorney's office to make an example of the men who refused to assist Troyer when he called on them.

Of Duluth's Neighbors

MCKINLEY.

McKinley, Minn., March 19.—(Special to The Herald)—Dr. Ranner, of McKinley, is looking after Dr. Sewell's interests at Biwabik and McKinley for a few days, Dr. Sewell being away on a short vacation.

Frank C. Payne went to Virginia Saturday evening, where he has accepted a position as timekeeper for the Norman Iron company. He will move his family to that point shortly.

A dozen new families have moved here in the past ten days.

Mrs. Sam Pearce returned from Virginia Friday.

Frank C. Payne has completed the loading of the saw logs belonging to the C. M. Hall Lumber company.

Frank C. Payne, of Biwabik, is having a few cars of his logs here for shipment to that point.

Charles E. Payne, the ex-minister, goes to the new church in Brainerd next Saturday laying off for a few days. He is relieved by Mr. Audley, of Duluth.

Capt. M. McArthur went to Duluth Monday.

Dr. Hanner, of Biwabik, was called over Monday to attend the child of George Little.

Frank C. Payne attended to business matters in Biwabik Monday.

Matt Matello, the Sparta liquor man, has decided not to open a branch here at present.

Charles Verrill and son Edward drove over from Biwabik Tuesday.

Gavin Gustafson, of Sparta, was in town a short time Tuesday.

H. A. Madsen of this place, will give a photographic entertainment in Sparta next Tuesday for the benefit of the church.

A small St. Patrick's dance was given at the Ramke hotel Thursday night and an enjoyable time was had by all.

A judgment for \$300 that has been standing against the village for some time has been satisfied.

Dr. J. R. James, of Sparta, who has been here spending a week in Minneapolis, returned home Wednesday.

Miss Olson visited with friends in Virginia Thursday.

Capt. Nottie, of Biwabik, was seen on our streets Friday.

John Carlson, of Carlton, was in town a short time Friday.

Mrs. William Carson went to Duluth Friday to visit friends.

Miss Olson Cayon did shopping in Biwabik Friday.

James McLane, who formerly was in the liquor business in Duluth, went to Biwabik today, where he expects to open a hotel.

M. L. Sullivan, the Cleopatra lumberman, passed through town today. He has completed his big contract for the season.

Two steam shovels arrived in Biwabik Thursday to be put up on the Drake & Stratton company's contract. Work will be commenced in a few days.

Not since the boom days have houses been in such demand in Biwabik. It is safe to say every house that can be rented at all will be rented the coming season.

John R. Miller came up from Sparta Friday. He has accepted a position at the Elba mine.

Rev. F. E. Clegg returned from Cleveland Thursday evening.

It is reported that the Drake & Stratton company will open a large new plant establishment in Biwabik in the near future.

Miss Hayes, of Brainerd, visited with friends in Biwabik this week.

SPARTA.

Sparta, Minn., March 19.—(Special to The Herald)—Active operations have begun at the Sparta mines. Gulbransen Bros. are stripping for timber, about 60,000 yards of dirt for stripping, and have commenced work. They expect to have 250 men at work in a short time.

The Sparta Iron company's stamping shop started at work stripping and making a cut so that an easy grade will be had to get cars into and out of the mine. The old grade leading the hauler two or three loads could be pulled out at a time.

S. W. Campbell, of Hudson, Wis., has been in town a few days this week looking for his permanent residence.

Lawrence Louis is now working as delivery man for the Sparta Bottling works.

D. Ford, of McKinley, transacted business here on Monday.

E. G. St. Clair went to Duluth Monday morning, returning the same evening.

W. R. Miller, of Portland, Maine, a brother-in-law of N. J. Colvin's, arrived here Monday evening and will stay for a week.

The new village council appointed August Benson as marshal in place of H. A. Powell, resigned. William Hogan was then acting as night police the past few days.

J. H. Mayhew, of McKinley, spent Sunday with his family here.

Capt. Channing of the Genoa, returned from his Eastern trip Thursday evening.

M. L. Sullivan's camp broke up Thursday; they put in about 600,000 feet of logs and timber. The work will be still continue work and will not be through for a couple of weeks yet. There is no snow at all the roads, and the logs have to be hauled to the landing on the river.

Mesdames Rogers, Powell and Fuller attended the performance given by the Eustis Dramatic club at Eustis Thursday evening.

Mr. and Mrs. Thomas Dunsmore, of Virginia, were in town Thursday.

Mrs. Blaie visited friends at Eustis Thursday.

It is just reported that Winston Bros. & DeAr have also secured a contract for stripping at the Sparta mine, and will go to work at once with a huge crew of men.

A sister of Mary Ann Skell met with a serious injury Thursday, while cutting wood. The ax came out of the handle and the saw blade cut a large gash in her forehead. Dr. Gibson sewed up the wound.

VIRGINIA.

Virginia, Minn., March 19.—(Special to The Herald)—The Franklin mine started Monday with a small force of men, but it will be added as more come out. It is made known that the mine will have at least 500 men at work this time next month. The Franklin has a fine record of membership and has been very successful.

Conducty A. A. Radley, inventor of the Radley air plane, has made a good showing. The Franklin engineers have used him, and the Radley-Francis, of Virginia, and during the two years it has been idle it caused the city to feel the

ELLEN OSBORN'S FASHION LETTER

Summer Girl, According to Designers' Ideas, Is to Be Queen Elizabeth as Far as the Waist.

TO BE A SERPENT WOMAN
Birds Have Left Their Perches on Hats, and Ribbon Bows and Flowers Are Now the Thing.

COPYRIGHT, 1888, BY BACHELIER SYNDICATE. [A "bustle" front, incrustated with ornamentation. To have this fashion come into being is the usual costume seen in New York.]—There are beautiful things offered to women's wear this spring, but along with them are nightmare excursions, worked out, apparently, by some designer suffering from a heavy load of history, raffled by a dozen of sensational fiction. The summer girl, according to this idea man, and his followers, is to be Queen Elizabeth as far as the waist; she is to be the serpent woman of sulphur novels from the waist down.

The plastron is the strong point of the Elizabethan share of this crazy patchwork. The essence of the plastron is stiffness. The softest and most clinging stuffs are those through which the mystery of the rest of the figure is expressed. The rest of the figure, we suggest, are cinched with the top of the man in armor and a snake's tail.

Both ends of this combination are studded with this material. The pointed stomacher, which came into vogue under the powdered and painted Henry IV of France, and was the height of popularity, is also the end of the head dress, modern chanteantes are following this model in detail. The underskirt is ruffed to the waist in some cases. In others the

meant blue, flared with white. A full ruff rises high on each side to show an accordian-plated blouse. The ruffs are made of ribbon ruffles, or broad bows, which have been tucked crossways both back and front and has a broad blue ribbon sash, which is knotted near the vest. It lies in the back and hangs down the front to the ground. To wear with this dress is a forget-me-not hat, which is woven of fine gray foliage that is the flower of this dress.

These dresses and thick make great use of ribbon ruffles. A pet trimming for cloth gowns consists of a pointed ruff, which is set at intervals from the hem to the knees.

The plastron front adjusts other fashions to itself most amply. A broad blue sash, for example, is made with a bustle and narrow tablet of cream leather; this is covered with a braid and edged with satin ruffles.

The sides of the basques are slashed, and inside the skirt, which runs over the bustle, is a band which is pinned to the ground. Instead of ignoring the sash, this immature plastron doubles it.

It is left off perchées on hats though the Audubon society may find next autumn that its rejoicings have been peremptorily suspended. We were up and down on hats of the softest, most crumpled straws. We are thinking, too, about the gayest and gaudiest of parades.

ELLEN OSBORN.

THIN COTTON GOWNS.

Reliable Exponents of the Season's Styles Seen.

In this first interval of fashion, when we are anxiously awaiting the startling revelations which can soon settle all doubts as to the leading theme of dress for the entire season, we are tempted on every side by a display of thin cotton gowns which we shall need last on the list of garments for a summer outfit, says the New York Sun. These are safely made up in our own dressing establishments from the styles which have been popular during the latter part of the winter and from advance reports of the winter and from advance reports of the season's fashions. The rest of the figure is expressed. The rest of the figure, we suggest, are cinched with the top of the man in armor and a snake's tail.

The plastron is of velvet and has tight sleeves with turned backs, lace edging, and a very full bustle. It is also the end of the head dress, modern chanteantes are following this model in detail. The underskirt is ruffed to the waist in some cases. In others the

it is not to be supposed that Equity will be so unmercifully unmercifully.

Fortunately there is no longer the fashion bedecked with bows, ribbons, and flowers. The softest and most clinging stuffs are those through which the mystery of the rest of the figure is expressed. The rest of the figure, we suggest, are cinched with the top of the man in armor and a snake's tail.

FACTS AND IDEAS OF HUMAN INTEREST.

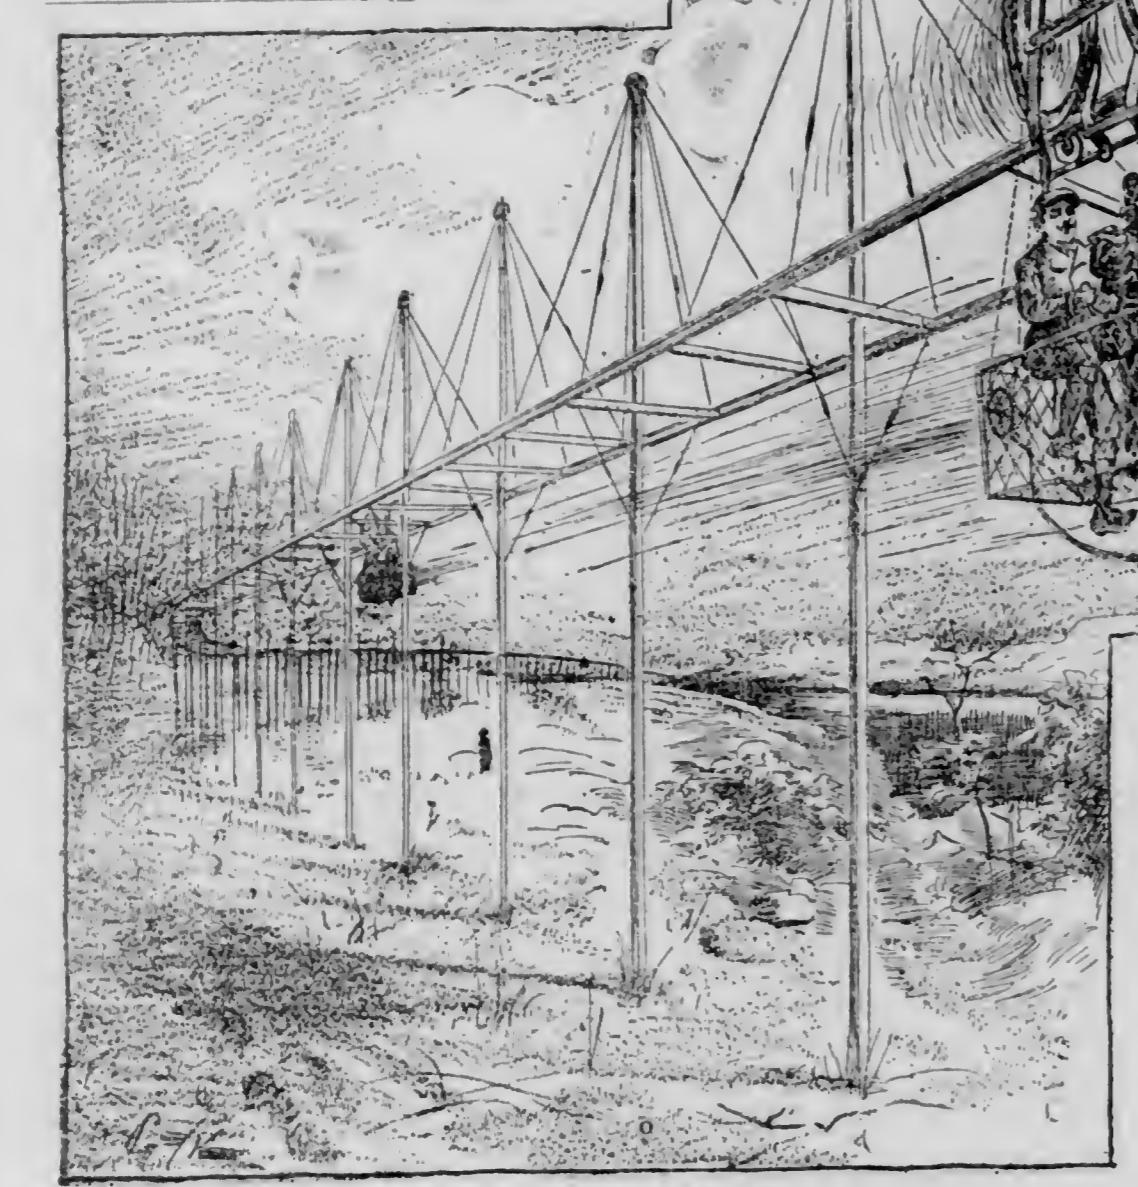

50 MILES AN HOUR ON THIS TROLLEY.

Copyright, 1898, by Bacheller Syndicate.

A curious world-beater to the inventors of the bicycle, as odd as it is interesting, has made its appearance. It is one of the most novel applications of the bicycle to the transportation problem that has yet been announced. The inventor calls it an elevated track and cycle, and claims that it can easily be constructed and operated at an expense of less than \$100.00, and with almost no danger of accident.

A carriage, such as that shown in the accompanying picture, is suspended from a frame, which are attached to two wheels with grooved tires, arranged one before the other so as to run upon the track directly over the top of the latter, the rear being held upon and at the ends of transverse supports arranged near the top of the poles which, something like an L road structure, are placed at regular intervals, the supports being strengthened by rod braces.

Additional security is given by two smaller grooved wheels which are connected with a swinging frame and pass along the under side of the rail, making it impossible for the wheels to jump the track. The passenger carriage may be

CYCLE TROLLEY ROAD.

of any length desired, but twenty feet is the inventor's idea at present. The carriages of each car is suspended by two wheels, each one of which will be maintained. The first road of this sort is now under construction in Mobile, Ala., and it is claimed that a speed of 50 feet per minute is attainable. The cost of constructing the road will be \$1500 a mile and that of the cars \$30 each.

At the front of the carriage are inclosed a bell and sprocket gearing, which may be operated either by foot power or a gasoline engine if desired. A chain connects the front sprocket with another sprocket at the back of the car-

riage, and from the latter sprocket a chain extends which, with its upper loop, engages the hub of the rear upper rail wheel. The carriage is attached at its ends to a sprocketed rail, which extends upward and over the large wheel, being united at their hubs by a horizontal bar which holds them rigidly in position.

The frame part of the carriage ex-

tends about six feet. Two light bar straps run around it, except at the gate entrance, where a folding gate is provided. It is intended to have the bottom of the carriage eight feet from the ground, where it is

suspended among his kind. Perhaps this is the explanation of the plight of the Sandy Hook fish. And this one fact may prove the experiment of the fish commission from accomplishing the results so earnestly desired.

HISTORIC OLD HOUSE A SOCIAL CENTER.

Copyright, 1898, by Bacheller Syndicate.

Two blocks from the Matanzas river, near the United States' barracks and parade ground at St. Augustine, Fla., is the oldest house in the United States, built in 1561 when the Spaniards settled St. Augustine. It is a queer looking old structure, and the accompanying picture from a photograph gives a good idea of what it looks like. Originally it was a monastery, and for twenty years was occupied by the Order of St. Francis. It was then moved into a larger and more pretentious building, and the old place became the residence of Spain's governors general, or colony leaders. The English utilized it for a short time, during their occupation of Florida, but when Spain again assumed control, the governor general lived in it as before.

In the second story is located the hall, where the abbot and his monkish associates met during their score of years that they inhabited the place. Their council room was situated in cells, where the monks slept and prayed. The partitions between these cells are of cedar, and the wood is just as good today as it was when it first

came into existence,

more than three centuries ago. The floor is composed of pine, and the reception rooms and the living rooms as they used to be, while a half enclosed veranda on the north side screened by plants (which are a rare species) is most charming, a spot for the monthly rest which is observed in St. Augustine as religiously as in Mexico.

A carriage would be rival to the trolley as odd as it is interesting in its appearance. It is one of the most novel applications of the bicycle to the transportation problem that has yet been unthought. The inventor calls it an elevated track and cycle and claims that it can easily be constructed and operated at an expense far less than the bicycle and with almost no danger to the cyclist.

A carriage, such as that shown in the accompanying sketch, is built upon a frame to which are attached two wheels with grooved edges, arranged one before the other so as to run upon the track directly beneath. This track consists of two rails being laid upon and at the ends of transverse supports arranged near the top of the poles which something like an A road surface are placed at regular intervals the supports being strengthened by radial braces.

Additional supports are held by two small pivoted wheels which are connected with a swinging frame and pass along the under side of the rail, making it impossible for the wheels to jump the track. The passenger carriage may be

CYCLE TROLLEY ROAD.

of any length desired, but twenty feet is the inventor's idea at present. The capacity of each car is supposed to be six people and the operator, but by using trains of four or more number desirous he can be transported, provided the motive power is sufficient.

At the front of the carriage are located the wheel and sprocket gearing, which may be driven either by foot power or a gasoline engine if desired. A chain connects the foot sprocket with another sprocket behind the back of the car-

not used along a roadway or street. If it is built along the latter, a height of from fifteen to eighteen feet will be required, and the trolley will be suspended from the top of the roadway. The sprocket will be attached to the frame, and the upper end of the chain will run up and down as required.

The frame will be made of wood, and the floor of a single sheet of iron. The floor will be covered with a heavy coating of paint, and the top will be covered with a heavy coating of varnish. The top will be covered with a heavy coating of varnish.

Each succeeding year the attire of the well-dressed man becomes more distinctive and individualized. The possibility of the colored shirt, however, becomes more difficult to select because it will harmonize with the shirt, but it is hard to find the best, so it is not permissible for the neckwear to outshine the colored shirt.

No observer of the world needs to be informed that the striped collar has superseded the necktie of the colored shirt.

What is the reason which I put to President Crocker of the American Society of Engineers, a successful man who feels the deepest interest in the progress and prospects of Young America?

"Well," said he, "the one agent that is doing most to provide new careers for young men is undoubtedly education. There are many opportunities for young men to be educated in one branch or other of educational work where there was one a generation ago. And the field is not full yet."

For spring wear the kids will be correct, and the various colors will be in vogue in various shades.

For three or four years, the new style of underwear which comes all in one piece has been popular for adaptation to the requirements of the season. The jump from collars to cuffs is easy; and it may be remarked that the high limit of the wrist will have either square or round corners, a depth of four, and a quarter inches, and be closed with tabs.

In history it is to be a season of the old and the new, and for the time being, retire to second place.

For spring wear the kids will be correct, and the various colors will be in vogue in various shades.

There has been any amount of curiosity on the part of the employes of the fish commission as to what would be the result of the tagging process. Thus far the only tagged fish known to have been caught is the one referred to in the accompanying illustration, in order to show the rate of growth of the fish the frequency of its

capture.

g

Gossip & of The Stage

"The Dazzler," among the oldest and best always a bright, fresh, new and vivacious farce comedy, will be presented at the Lyceum next Monday by George and Grant's comedians. It is one of those collecting farces comedies that is decidedly short on plot, but long on fun. This is a story, but it never abridges itself to fit into with the time, which is fast and hurried, and starts to finish in a jiffy. And Giza's the audience are there to entertain, and with their abundance of bon mots, their readiness in step into a lively dance or turn a merry song, they provide a perfect entertainment of its kind.

A few favorites of last year's company, Ida Rogers, Will West, Lazarus and the like, will also be present. But the German comedian, whose dancing is making a wonderful stir, Agnes Evans, the elegant prima donna, and the brilliant, charming, and moving in a great variety of musical entertainments, for the most part, are the stars of the show. The music, however, his songs would cause the music to shake so that the effect of his blue slinging would be sadly marred.

Mollie Slat is quoted as saying this evening she is glad the band on board the "West" are a good company, but little money and no time to give to charity, but she can lend her talents now, and then without charge.

If they can appear twice a day, as they do in vaudeville, what they do for charity won't mean much.

They are some literally well as they are in a new dress.

Lewis Morrison, the favorite actor, Lewis Morrison, is received as the attraction at the Lyceum next Monday evening. He will play "The Merchant of Venice." All the scenes for Morrison's Merchant were exhausted long ago, and one can but guess all the remaining scenes will be taken from the masterpiece of the master, with Edward S.otheron, Joseph Jefferson, Laura Keene, Edwin Varié and Sara Stevens in the cast. Mrs. Henry C. Hall, the star of the cast, is still yet most polished of the girls who will be seen, and joined to the company of the first night, the charming, and now, sarcastically, irreverent, and amorous, and with a strong contempt for the manners of individuals, "man" and even a personification of man, last, and best, and the character of the characters he has created the man like his spider.

It may be safely assumed that the young lady to whom Paul Gilmore was married not long ago, has considerable money, as it is now announced that the young actor, who is playing "Faust" at the Olympia, Irish heroes, has purchased all of the costumes and scenery left by the late and much beloved artist, Salvado Salvador, who was acting in Salvi's romantic repertoire with the addition of one new play called "A King Without a Country." Gilmore is a pretty good actor and will be remembered as the leading man of the St. Louis company, their last engagement here, in "The Wife." The engagement here, in "The Wife," the wife, the boy and others of the Blasé and he might be the man like his spider.

The costume pieces for E. R. Rice's newest production, "Mante Carlo," have been placed on view and are thus described: Long skirts, very full, and flowing, the accessories of hats and lingerie, and the aerial Mr. Rice has hit upon some interpolations that will furnish a horn of his own composition performed by seductive and sharply tailored of the type peculiar to his production. Such satire as Rice's "Tans" can nowhere else be found on land or sea. They are invariably feminine, opaque, and broad of silk, muslin, satin, and the like, the combination of many kinds of satin would be wholly impractical when it came to shielding down the main neck or lying on the back, and so on. If American men-of-war were manned by Rice's saucy maidens, the whole Spanish navy would desert to the United States.

One idea is that the beautiful little visitors to Monte Carlo go about in short, white satin skirts, profusely decorated with diamonds and pearls, and diamonds, and that one of their favorite diversions is to whirl through the masses of his lewdly "caravans" at the gambling houses, couplers, or shapely young women, in red waistcoats and black satin coats and knee breeches.

When Edward Milton Royle wrote "Friends," everybody thought great things of his next attempt at dramatic writing, and when he followed "Friends" with "Mexico" there was but little disappointment, for it was generally considered that such a much more strong and stirring melodrama if Mr. Royle would allow someone who was not the play's leading part to revise the play, and then the result was a success. Now Royle's idea is that the beautiful little visitors to Monte Carlo go about in short, white satin skirts, profusely decorated with diamonds and pearls, and diamonds, and that one of their favorite diversions is to whirl through the masses of his lewdly "caravans" at the gambling houses, couplers, or shapely young women, in red waistcoats and black satin coats and knee breeches.

The presentation of "Faust" this season is made notable from the fact that every girl and gown is essential to the play, and the male picture has not only been freshly painted but newly designed. It has always been one of the characteristics of the play that it is a "showy" "Faust" not only an ad quide, but a thoroughly complete and brilliant staging, the play is rich in opportunity for effects, and every scene thereon has been enhanced. There are seven scenes in the play, and every one of them is new. The famous Brookwood Opera Company is doing its best and leaders on the metropolitan stage, and leaders on the metropolitan stage, but also to those who are not familiar with the technique of music.

The presentation of "Faust" this season is made notable from the fact that every girl and gown is essential to the play, and the male picture has not only been freshly painted but newly designed. It has always been one of the characteristics of the play that it is a "showy" "Faust" not only an ad quide, but a thoroughly complete and brilliant staging, the play is rich in opportunity for effects, and every scene thereon has been enhanced. There are seven scenes in the play, and every one of them is new. The famous Brookwood Opera Company is doing its best and leaders on the metropolitan stage, and leaders on the metropolitan stage,

MARSHALL & CO., THEATRICAL COMPANY, in the field of legitimate theater, that is the worry is how to get the public coming to the attraction in large enough numbers to make the engagement a paying one, and the question is sign is used so seldom that when it does seem to display it, it is likely to be best to the Marshall & Co. company's engagement in the coming season. This might well be called the sad story of a playwright who had the art of being a playwright but also to those who are not familiar with the technique of music.

Two new companies will be on the road next season. They will be launched by the Alcott & Co. The new company will have fifteen All-American stage managers and comedians. The dramatic company's repertoire will include "Hold Her Close," "The Girl of the Golden Kelly," "Hazel Kirke," "Esmeralda," "Master and Man" and "The Octogenarian." The success of the Alcott Company, particularly to Alcott, who is a great manager and comedian during its first season. He introduced vaudeville between the acts and other entertainments, notably singing and dancing, singing, dancing, and comedy, and his company was used as the initial attraction at the Keith house in Philadelphia, New York and Boston. Alcott has been employed in the Keith circuit for several years at the Keith houses, and his opera companies enjoyed runs that surpassed previous records in these towns.

Actors have compensation in ripening, like good wine, with age, says Hiram Bell in the "Daily News." We have written John Drew for fifteen years without wearying of him. Ten years ago Ada Rehan played "The Country Girl," and she plays it still with undiminished applause. Age cannot stand

her custom wither. Sarah Bernhardt's infinite variety. But the poor vanishing face comedy, will be presented at the Lyceum next Monday by George and Grant's comedians. It is one of those collecting farces comedies that is decidedly short on plot, but long on fun. This is a story, but it never abridges itself to fit into with the time, which is fast and hurried, and strong start to finish in a jiffy. And Giza's the audience are there to entertain, and with their abundance of bon mots, their readiness in step into a lively dance or turn a merry song, they provide a perfect entertainment of its kind.

A few favorites of last year's company, Ida Rogers, Will West, Lazarus and the like, will also be present. But the German comedian, whose dancing is making a wonderful stir, Agnes Evans, the elegant prima donna, and the brilliant, charming, and moving in a great variety of musical entertainments, for the most part, are the stars of the show. The music, however, his songs would cause the music to shake so that the effect of his blue slinging would be sadly marred.

The latest of Sir Arthur Sullivan's works is the light "The Mikado," a religious music drama, and it is not called a success, although it was given a flattering reception in Edinburgh when first presented.

DULUTH EVENING HERALD.

MINNESOTA
HISTORICAL
SOCIETY.

FIFTEENTH YEAR.

MONDAY, MARCH 21, 1898.

TWO CENTS.

A Well Dressed Man

Can have his every want supplied to the uttermost this season at—
"The Big Duluth."

This Store Grows...

Each season finds it bigger, better, more fully equipped for larger demands, the varied wants of more patrons. Believing in improved conditions—better times if you please—our step forward was a large and long one for the

Spring Season of '98

Every department in the old store is crowding the counters, tables, and shelving of its respective departments, and more arriving and ready. You know our line, but let us

challyenge you to the rear and for the

New Suits

Manufacturers never made handier or better fashions; tailors never fashioned better fits, and workmen never trimmed or made them better in every respect. The newest and latest in sacks and Frocks.

Your money back if you want, is ever and always the maxim in trade here. Store open tonight till 9 p.m.

Men's and Boys' Outfitters. *The BIG DULUTH WILLIAMSON & MENDENHALL.*

SHIPPING IS BEGUN

Iron Range Railroad Commenced Hauling Ore From Chandler Mine Today.

WILL GO INTO BOATS

Two Left Duluth Today to Take on Ore at Two Harbors.

The Duluth and Iron Range Railroad company began loading ore on the cars from the Chandler mine stockpiles at Ely today and the ore shipping season has practically opened. As fast as the ore reaches Two Harbors it will be loaded into the vessels. It is not being considered prudent to put it in the ore pockets on the docks for fear of freezing weather.

Shipments are begun early in anticipation of a thousand events in the shipyards. The long crack has had its appearance and it is thought that unless a considerable amount of ore is removed before the ice sets in there will follow which is liable to let some of the ore down a distance of 150 feet. Last spring a crack in the Chandler mine took some ore off the stockpile at the Chandler down a few feet, but the threatened trouble this spring may prove more disastrous than it is anticipated.

The crack which has come as a warning of what may follow is very near where the railroad track is laid. The two harbors and what back 150 went to Two Harbors today to receive the first ore that arrives at the dock, they will be followed by the Constitution and Manda and the Victory will go down Friday or Saturday. There are in the harbor four large boats which are all ready to clear for Cleveland as soon as the passage through the Sault Ste. Marie river is open. They were loaded at the iron range section and are from the Sparta mine, which had been delivered at the docks and which was placed in storage for storage during the winter to prevent it from freezing in the pockets.

There is in the stockpiles of the Chanan iron range 1,000 tons of ore, 200,000 tons of which there was at the close of the shipping season, the remaining 200,000 tons having been mined during the winter. The Chandler has an amount of 700,000 tons for this year, so it will only be necessary to take out 250,000 tons to complete it. Much of it will be the responsibility of the company to haul the mine, however, for it is not the policy of the company to exhaust its stockpiles at any time.

The iron range is far advanced at the mines as it is here. The lakes are still frozen solid and little thawing weather has been experienced so far as is known that no ore can be shipped from the stockpiles before the break up comes.

RAILROAD LEGISLATION.

Senate Committee Arranging to Collect Some Old Debts.

Washington, March 21.—The senate committee on Pacific railroads today decided to report the bills for settlement of the Central Pacific and San Fran. Pacific debts. The secretary of the treasury, the secretary of the interior and the attorney general are created a commission to settle the debts and to make such extensions as may be necessary to secure the government's interest in the case of the Central Pacific and an amendment was adopted providing that the principal and interest be paid. No limitation was placed on the St. Louis City & Pacific, and it is probable that Senator Morgan and others will make a minority report of a similar restriction to that placed on the Central Pacific settlement.

OPERA HOUSE FIRE.

Buffalo, N. Y., March 21.—The new Grand Opera house of St. Thomas, Ont., was burned last night. It was owned by Rothwell of Detroit.

REPORT IS FINISHED

Verdict of the Court of Inquiry on the Maine Disaster Ready.

HANDED TO SICARD

Expected to Be Taken to Washington Tomorrow By Judge Advocate Marix.

Key West, Fla., March 21.—Judge Advocate Marix of the court of inquiry came ashore at 3 o'clock this afternoon accompanied by an armful of documents from the Iowa, who carried a bulky package of official documents, which were handed over to General Sicard.

It is believed the documents are the full findings of the court of inquiry. Lieut. Commander Marix, when questioned, refused either to drop or confirm, but an officer from the Iowa said the documents were the long expected report on the Maine disaster. The judge advocate is to call on the rear admiral and Commander West. It is presumed that if these documents are the anxiously expected report they will be taken to Washington tomorrow by Lieut. Commander Marix.

NOT AT WASHINGTON.

Court's Report Has Certainly Not Reached the Capital.

Washington, March 21.—It can be stated positively and authoritatively that the report of the court of inquiry on the Maine has not been received upon to noon today.

The Maine survivors who arrived here Saturday, it was stated, were on their way by overlocking or passing over a high official and committing such a grave offense to junior officers as to cause a blow to the Senate. Lieut. Bouteille said that the purpose and provisions of the bill were well understood and so far as he was concerned, the right of habeas corpus.

The report is coming by Capt. Barker, as some press despatches intimate, the fact is not disclosed in any quarter, but it would be the routine

upon which the report will be transmitted, made public, as it would merely serve to jeopardize its transmission.

Capt. Barker left Washington the middle of last week. He is the naval aide to Secretary Long, and it is naturally inferred that his going to the latter office is some direct relation to the pending question. Further than this, however, the naval officials will say nothing as to the purpose of his

Secretary Long's office in the navy department, and the general secretary of the navy, Mr. Long, Mr. Hale went from the secretary's office to the White House and had a talk with the president. He was followed by Capt. Long, who spent half an hour with the president.

The Spanish minister called at the state department today and presented his credentials, and it is understood that he was the direct representative of the autonomous cabinet at Cuba. With this presentation negotiations toward a general agreement between the United States and the German Americans, who cast a large vote in the last presidential campaign, also demand recognition.

Davis is popularly friendly to Evans and is anxious to see him endorsed by the Senate.

It is understood that the majority of the German Republicans of Minnesota would have selected him, but he must be satisfied with this recognition of their nationality.

BERT COSTELLO'S OPERATION.

It Disclosed a Fracture Dislocation of the Vertebrae.

Dr. McMillen related this morning from Chicago where he was in attendance at the operation performed upon Bert Costello and which resulted fatal.

The Spanish minister called at the state department today and presented his credentials, and it is understood that he was the direct representative of the autonomous cabinet at Cuba. With this presentation negotiations toward a general agreement between the United States and the German Americans, who cast a large vote in the last presidential campaign, also demand recognition.

Davis is popularly friendly to Evans and is anxious to see him endorsed by the Senate.

It is understood that the majority of the German Republicans of Minnesota would have selected him, but he must be satisfied with this recognition of their nationality.

CRUISER NEW ORLEANS.

That is the American Name for the Brazilian Purchase.

Washington, March 21.—Secretary Long issued an order today that the Amazonas, the cruiser recently purchased at New Orleans, be given the name of the principal city of Louisiana. Telegrams from the naval officer in command of the vessel, who will take immediate steps to carry this into effect.

New Orleans was chosen as the name of the vessel acquired from the sister republic of South America for the reason that Louisiana is one of the very few states of the Union not represented in the Brazilian government.

Representative Cousins made an eloquent speech, announcing that a patient and patriotic people were ready for the truth and for their duty. The house then took up the bill with the highest credit to itself and the nation.

IN THE SENATE.

Washington, March 21.—The senate, after passing some minor bills to which there was no objection, adjourned at 1:35 until tomorrow.

A DESPERATE LOVER.

Wounds His Sweetheart and Then Kills Himself.

Wellsville, Ohio, March 21.—While returning home from church last night Oliver Reed asked Sarah Walton to marry him and upon her refusal drew a revolver and shot her in the head. Her son turned the weapon on himself and blew out his brains, dying in short time. A paper found on his body showed that the dead was premeditated.

MRS. JACKSON DEAD.

An Exceeding Erratic English Woman Dies in London.

London, March 21.—Mrs. Jackson, who became prominent in 1891 as the principal in what was known as the Clitheroe case, is dead. Miss Emily Hall, who was born in 1854, was married to H. E. Houghton Jackson, at Blackburn. They never lived together, she returning to her friends and he going to New Zealand. In 1888 Mr. Jackson returned to England, and got a divorce from his wife, and had one interview with her, but she steadily refused to live with him. Litigation began then. A decree against her was obtained in 1888.

On March 8, 1891, Mr. Jackson and

others seized Mrs. Jackson when she was coming from church at Clitheroe and carried her off to his house at Blackburn, where she was placed in charge of a nurse and closely confined. Mrs. Jackson obtained a writ of habeas corpus and she was brought before the court of appeals, which eventually decided on March 19, that a husband has no legal power to retain his wife against her wish. Mrs. Jackson returned to friends.

SUPPLIES FOR CUBANS.

To Be Sent Whether Spain Consents or Not.

Concord, N. H., March 21.—Senator William E. Chandler, in an editorial in Concord Monitor today says: "President McKinley is about to take action in the name of the United States to relieve the families of Spanish rebels in Cuba. Food and medicine and clothing," he says, "given by the generous people of the United States, will be sent with the approval of the Spanish government, and the arrival of American steamer, or soldiers without that approval, if she does not consent."

If the end of starvation and torture is not at hand. Every humane person in this whole land should sustain and bless the rebels. In his concluding paragraph he writes: "I hope that the trial of William McKinley to be held in sacred reverence by the Cuban generations as long as will be revered the name of Abraham Lincoln by the colored race in America."

SENATORS AGREE.

Decide on Evans For District Attorney and Von Bombach for Collector.

Washington, March 21.—(Special to The Herald.)—The long-continued disagreement between Senators Davis and Nelson over the appointments of the United States district attorney and collector of internal revenue for Minnesota was settled today by a compromise. It was decided to endorse ex-Republican National Committeeman R. G. Evans, of Duluth, for district attorney and Fred von Bombach for collector of internal revenue.

Von Bombach, who resides in the second district, was a candidate for a seat in the legislature.

He was defeated in the election of 1896.

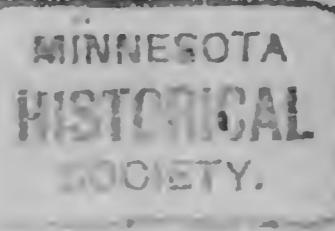

He was a member of the legislature.

DULUTH EVENING HERALD.

FIFTEENTH YEAR.

MONDAY, MARCH 21, 1898.

TWO CENTS.

A Well Dressed Man

Can have his every want supplied to the uttermost this season at—
“The Big Duluth.”

This Store Grows...

Each season finds it bigger, better, more fully equipped for larger demands, the varied wants of more patrons. Believing in improved conditions—better times if you please—our step forward was a large and long one for the

Spring Season of '98

Every department in the old store is crowding the counters, the shelves of its respective trade, and more arriving daily. You know our line, but let us specially remind you of

New Suits

Manufacturers never made hand-somer or better fabrics; tailors never fashioned better fits, and women never trimmed or made them better in every respect. The newest and latest in sacks and Frocks.

Your money back if you want, is ever and always the maxim in trade here. Store open tonight till 9 p.m.

Men's and Boys' Outfitters. **THE BIG DULUTH** WILLIAMSON & MENDENHALL. 125-127 W. Superior St.

SHIPPING IS BEGUN

Iron Range Railroad Commenced Hauling Ore From Chandler Mine Today.

WILL GO INTO BOATS

Two Left Duluth Today to Take on Ore at Two Harbors.

The Duluth & Iron Range Railroad company began loading ore on the cars from the Chandler mine stockpiles at Ely today and the ore shipping season has practically opened. As fast as the ore reaches Two Harbors it will be loaded into the vessels. It may be considered prudent to put it in the ore pockets on the docks for fear of freezing weather.

Shipments are begun early in anticipation of a threatened cave-in at the stockpiles. A long crack has made its appearance in it and the ore unless a considerable amount of ore is removed before a thaw sets in that a cave-in will follow. The ore and provisions of the bill were well understood and so far as he was concerned he thought debate unnecessary. Still, he was given a chance to yield to the desire of the house.

Mr. Bailey said there was no opposition on either side. In his speech he desired to speak in connection with the district attorney he would serve for the naval appropriation bill.

The bill is now in committee.

Mr. Cannon, chairman of the committee on appropriations offered an amendment to allow the surviving officers and men to receive compensation in full in compensation for losses sustained by them. This provision, he thought, preferred to indemnify the survivors against the loss of their pay.

Mr. Pritchard also had a talk with the president.

He was followed by Secretary Long.

Secretary Long's office in the navy department was again the center of conference today. Senator Hale, chairman of the committee on naval affairs, had some new ideas on naval appropriations and the bill was sent back to him.

Mr. Hale had a talk with the president.

RELIGIOUS LIBERTY

Methodist Ministerial Association Want Greater Religious Liberty.

MARRIAGES IN PERU

At Present Roman Catholic Clergy Have a Monopoly In That Country.

Chicago, March 21.—At the meeting of the Methodist Ministerial association today the Rev. John Lee, chairman, read a report of the committee on religious liberty for Protestants in South America. The report stated that the committee was greatly encouraged. It aims to accomplish three things:

1. To secure religious liberty for missionaries working in the republics of Peru, Ecuador and Bolivia.

2. To secure religious liberty for native Christians who disown the Roman Catholic faith.

3. To secure the fullest civil liberty for foreigners and native-born Protestants, especially by legalizing the marriage of persons other than the clergy of the Roman Catholic church.

The committee, it is said, asking more for the Protestants in these South American republics than is cheerfully granted to Roman Catholics in this republic.

Letters had been addressed to prominent persons in various parts of South America setting the aims of the committee, and a large number of replies had been received. Among them was one from President Cleveland, who wrote: "I hope an advance of the largest liberty to all people in our land will be strong in favor of any movement having for its object the perfect security and absolute freedom in the Southern states of our citizens to worship God according to their own consciences. The demand for such freedom, it seems to me, is only reasonable and just."

Ex-President Harrison reported that he had given his hearty endorsement to the work of the committee, which is now universally given by Protestant countries to citizens and residents of the Roman Catholic faith calls for reciprocal treatment in Roman Catholic countries.

The Rev. John Butler, of Ohio, in his reply, referred to a conversation he had with President Diaz, who said: "The clergymen in our country are not all ignorant, and religious and civil liberty will be had at all costs."

A ST. PAUL EXHIBIT.

Saintly City to Group and Exhibit Its Manufactures.

St. Paul, March 21.—The success of the recent exhibition of home-made goods has stirred the Northwest manufacturers' union to more ambitious efforts, and at the annual meeting of the union, which is held this evening, a proposition will be made to hold a similar exhibition and management of St. Paul in May.

The idea is to have every manufacturer in the city represented and to show how various things made here are manufactured. There will be machinery in operation, and visitors may witness practical demonstration of the extent and variety of St. Paul enterprises.

The intention is to occupy the entire Market hall, and the union is one of the best things ever undertaken in this city.

At the meeting tonight officers will be chosen for the ensuing year. It is not expected that there will be any change.

The by-laws of the union may be amended so as to place the management of the exhibition in the hands of a board of directors. The officers are at present responsible for its management.

The union feels that it has not enough room in the market house for its permanent exhibit, and additional effort will be made to acquire more space.

AN EDITOR'S FUNERAL.

Impressive Burial of F. W. Lee at Rush City.

St. Paul, March 21.—A special train of Paul newspaper men, Masons, Elks, etc., went to Rush City, Minn., yesterday to attend the funeral of the well-known poet, novelist and dramatist, Franklin Warner Lee, formerly of this city, and at the time of his death editor of the "Rush City Post."

Lee was most widely known as the author of the farce, "The Sun Gazer," which Joe Ott played for two seasons, and also as the author of "The Romance of the Extravaganza," "All Babes" for Manager David Henderson, of Chicago.

The funeral services were conducted jointly by the Masons and the St. Paul of the kind ever seen in Minnesota. Rev. Mr. Streeton, Episcopal, of White Bear Lake, presided at the burial at Rush City and the service was one of the largest and most remarkable of the larger cities. The interment was at the Rutherford cemetery.

OPENING OF NAVIGATION.

Large Grain Fleet Will Leave Chicago About April 2.

Chicago, March 21.—Lake navigation will open on April 1, the beginning of marine insurance. If that date did not come on Friday a large fleet would sail then, but the date of earliest navigation is fully determined. The Chicago grain fleet from 3 cents a bushel at the beginning of the winter to 25 cents the rate now prevails.

The grain fleet at Chicago numbers 188 vessels and has 12,995,000 bushels of grain. The fleet will probably hold off opening the navigation until April 10 or later. Chicago grain has run from 3 cents a bushel at the beginning of the winter to 25 cents the rate now prevailing.

JUDGE GOODMAN TELL.

Chicago, March 21.—Judge James Goodman, the superior court, who was made famous for his decisions that entitle police officers to greater severity in their work, has died. He was 65 years old.

Under existing circumstances Lake Superior will be open for an immense traffic far exceeding all previous records. It is estimated by W. L. Brown, the iron magnet, that the movements of iron ore of the Lake Su-

ALASKAN MURDERS

KILLED BY A WOMAN

Skaguay Has a Murder In Which a Negro Woman Figured.

In recent years, consumption was considered absolutely incurable. It is now known to be curable. During the past thirty years it has been demonstrated that Dr. Pierce's Golden Medical Discovery will cure 90 per cent. of the cases. It is the result of the earlier stages of the disease before the lungs are too much wasted, also bronchitis, asthma, hæmoptysis and all diseases of the lungs, driving out all impurities and disease germs. It soothes the cough, expels expectorants, thus clearing the lungs, expelling old mucus, blood and tears down, carries off and expels old inert, halfdead tissues, replacing them with new, firm, elastic tissue. It is the specific sharpener, blood-maker, flesh-builder, nerve-tonic and restorative. Thoroughly applied, it will restore health by this marvelous medicine. Do not buy from unscrupulous dealers who try to force upon you some cheap imitation. This is nothing to take the place of Dr. Pierce's Pellets cure constipation.

"I am the girl which left you feeling miserable with a fit and a cough," writes Mrs. C. Maynard, of East Lyne, New London Co., Conn. "As some of my friends say, I am the last of the Roman Catholic faith."

It is the belief of the South American republics the fullest civil liberty for foreigners and native-born Protestants, especially by legalizing the marriage of persons other than the clergy of the Roman Catholic church.

The committee, it is said, asking more for the Protestants in these South American republics than is cheerfully granted to Roman Catholics in this republic.
